Introduction

The Southern Tier West Regional Planning and Development Board ("Southern Tier West") is a regional planning council, a unit of government created pursuant to New York State General Municipal Law section 239-h. Southern Tier West was designated an Economic Development District (EDD) by the U.S. Department of Commerce Economic Development Administration ("EDA") in 1977. The functions of the EDD include, but are not limited to, preparing and maintaining a Comprehensive Economic Development Strategy ("CEDS"), assisting in the implementation strategies identified in the CEDS, and providing technical assistance to Economic Development Organizations throughout New York State’s Southern Tier West Region ( Allegany, Cattaraugus, and Chautauqua Counties). These three counties, as members of the Southern Tier West EDD, are designated by EDA as redevelopment areas and are eligible for financial assistance from EDA for eligible and appropriate economic development projects. This EDA funding eligibility also extends to the municipalities, economic development entities, and non-profit organizations located within these counties.

This 2020 Comprehensive Economic Development Strategy ("2020 CEDS") is a strategic plan for economic development for New York State’s Southern Tier West Region, prepared and published by Southern Tier West. The CEDS is developed by the Southern Tier West CEDS Strategy Committee, which is comprised of a broad range of public sector, regional economic development, business, civic, education and workforce development professionals.

The purpose of the implementation of the CEDS is to create an economic environment that fosters job creation, a more diversified economy, and improves the quality of life for the residents of the three county Southern Tier West region. The CEDS outlines appropriate strategies and projects for implementation by local governments, private industry, organizations, and individuals concerned with economic development. Additionally, through their inclusion in the CEDS, and their identification by Southern Tier west as priority economic development projects for funding by EDA, economic development projects in the Southern Tier West region qualify for grant funding from EDA.

Southern Tier West annually prepares the CEDS per a contract with EDA. EDA has specific requirements for the CEDS planning process, document format, and document content. The 2020 CEDS was prepared through a comprehensive planning process per EDA CEDS requirements, and conforms to EDA’s requirements.

Impact of Coronavirus Pandemic Economic Downturn on CEDS Planning Process

When Southern Tier West began the planning process for the creation of the 2020 CEDS, the USA was just heading into the coronavirus pandemic, with the associated economic downturn that was experienced by the entire nation. Like the nation, the region wishes to implement strategies that will result in economic recovery. These strategies, and the activities and initiatives that flow from these strategies, normally would be the province of this CEDS. However, several issues present themselves. First, data describing the impact of the downturn are not yet available, as even seasonally unadjusted data lag the actual downturn. Second, the downturn is ongoing, and the severity and impacts of it are not yet fully known. Third, the business and economic development community are not up to speed as to what the optimum responses might be to the downturn. Fourth, federal and state responses and programming are still in the process of being developed. Because of these issues, this CEDS primarily has been prepared using data available and economic development strategies available during the 2020 CEDS planning period.

Nonetheless, there are several regional response initiatives underway. Regional small business revolving loan funds operated by the Chautauqua County Industrial Development Agency and the Southern Tier Enterprise Development Organization have secured federal approval for revising their local fund operating rules so as to be more flexible regarding accessibility and usability of their loan funds by businesses that have been negatively impacted by the coronavirus downturn.

Additionally, both Southern Tier West and the Southern Tier Enterprise Development Organization have applied for additional federal EDA funds as part of the region’s economic response to the pandemic dislocation. Southern
Tier West will use these funds for (a) the development of an economic recovery and resilience plan, tied to the CEDS, that will address the economic impacts of the coronavirus pandemic, (b) the provision of technical assistance, as necessary, to local governments, businesses, and other stakeholder organizations, and (c) the funding of appropriate technology and staff support for these pandemic-response activities. EDA has awarded these funds to Southern Tier West, and the initiative began in the summer of 2020.

The Southern Tier Enterprise Development Organization proposes to use the requested EDA funds for additional small business loan funds. EDA anticipated awarding these funds during the summer of 2020, and these loan funds would become available immediately thereafter.

Additional priority response projects will be listed in the CEDS as they are developed. Southern Tier West’s economic recovery and resilience plan also will result in additional response initiatives, which will be listed as high priority projects in updated versions of this CEDS, as well as in subsequent CEDS documents.

**Executive Summary**

For decades, the rural three-county Southern Tier West region, located in southwestern New York State at the northern tip of the historically economically distressed Appalachian region, has experienced economic distress that very often has exceeded that of either the State or the nation as a whole. In recent decades, regional unemployment rates often have exceeded State and national unemployment rates; regional per capita income levels often have been significantly below State and national per capita income levels; regional per capita income levels often have failed to keep pace with inflation; and businesses and residents have emigrated from the region.

The nation’s economy continues to recover from a recession. The Southern Tier West region’s economy also has experienced a revival of its economy of sorts, but our region nonetheless continues to be more economically depressed than the State and the nation as a whole. Our region continues to experience economic dislocation in the form of business closures, business departures (often of non-locally owned plants), layoffs, unemployment, and population outmigration. Our region struggles to remain economically competitive with other regions and the global economy, and struggles to maintain and grow value added, high paying jobs.

In the future, our region’s economic health and quality of life will be dependent upon its ability to regain and improve on its economic competitiveness, a goal whose achievement is made more difficult because of the dynamic restructuring of and challenges facing the regional, national, and global economies. Our region, like the nation as a whole, is experiencing a long-term transformation from a commodity-based manufacturing-based economy into a technology-based and service-based economy. Developing foreign economies, domestic relative comparative disadvantages, and the restructuring of the global financial, product, and services markets all present challenges to domestic regional economies such as ours.

To maintain and improve its standard of living, our region must transform its regional economy into a regional-net-export-surplus, knowledge-based, innovation-based economy that is more internally self-sufficient, i.e., that is less dependent upon the extra-regional economy. It is essential for our region to maintain and cultivate the value-added regional-net-export-surplus sectors of the regional economy – be they manufacturing, service, or agricultural – in industry clusters and occupation clusters in which our region enjoys a competitive or niche advantage, in which there is opportunity and capacity for innovation, and in which there is significant growth potential.

Traditional economic development strategies generally fall into one of two camps: needs-based economic development or asset-based economic development. Needs-based economic development focuses on identifying gaps and deficiencies in the local economy and attracting new investment or industries to fill those gaps. Needs-based economic development can be more sensitive to the boom-and-bust cycle or to changes in State or federal policy environments, and it is a strategy that often will have a lower probability of success. In contrast, asset-based economic development builds on existing local resources (“assets”) to strengthen the regional economy. Asset-based economic development typically (1) is easier to motivate, (2) is a higher-probability-of-success type of
strategy, and (3) is more likely to result in long-term sustained economic growth. This CEDS essentially is primarily an asset-based economic development strategy.

Fortunately, our region has a number of significant economic and human resource assets that form the foundation for our current regional economy and can be utilized to achieve sustainable and globally competitive economic development. It is essential that, at the regional, county, and local levels, our region builds upon these assets to capture opportunities that are available.

This CEDS sets forth the following **Vision** for the future of the Southern Tier West region:

*The Southern Tier West region will become a region whose economy is globally competitive, is dynamic and growing, and provides meaningful and sustaining employment for its residents. The Southern Tier West region will transform its regional economy into a regional-net-export-surplus, knowledge-based, innovation-based economy that is more internally self-sufficient, i.e., that is less dependent upon the extra-regional economy. The Southern Tier West region will maintain and cultivate the value-added regional-net-export-surplus sectors of the regional economy – be they manufacturing, service, or agricultural – in industry clusters and occupation clusters in which our region enjoys a competitive or niche advantage, in which there is opportunity and capacity for innovation, and in which there is significant growth potential.*

To achieve this Vision, the region should attempt to achieve the following **five economic development goals**:

1. **Human Capital** – to develop a skilled labor force capable of creating a knowledge-based and innovation-based economy, and that encourages businesses to start, locate, and expand in the region

2. **Traditional and Non-Traditional Infrastructure** – to maintain and improve the region’s built environment and services that are requisite for retaining and expanding existing businesses and attracting new businesses

3. **Innovation and Entrepreneurship** – to catalyze innovation and new business development and growth, especially as regards technology-based, value added, and net export businesses

4. **Quality, Connected Places** – to create quality, connected, safe, convenient and healthy places to live and work, that make the region attractive as a place to live, work and do business

5. **Collaborative Leadership** – to encourage coordinated governance and rational and coordinated systemic investment in targeted economic development initiatives

The strategic recommendations (i.e., strategies, projects, programs, and other activities) contained in this CEDS are consistent with and designed to achieve these five stated goals.

This CEDS document uses data-driven analytical techniques to inform its SWOT analysis, to evaluate the region’s capacity for innovation, to identify significant target industry clusters, to identify significant target occupational clusters, and to discuss the development of strategies and projects based on these analytical results.

By incorporating these analytical techniques relating to innovation and clusters, and by incorporating the Vision of moving toward a more regional-net-export-surplus, knowledge-based, innovation-based economy, Southern Tier West is using this CEDS to attempt to transform the paradigm of economic development within our region from a philosophy that often is “deal-driven” or “specific-opportunity-driven” – sometimes even reactive – to a philosophy that clearly also embraces and encourages – as a primary strategy – a reinvigorated emphasis on proactive initiatives related to economic inputs, knowledge, and innovation.

The result is the following **CEDS strategic foci**:

1. Target economic development activities and initiatives toward significant regional **industry clusters and occupation clusters** that are value-added and net export clusters

2. **Promote and catalyze entrepreneurship**

3. Increase the quantity and quality of **human capital** through education and job training, to develop a highly skilled, tech-savvy regional labor force
4. Augment our region’s educational services to encourage improved STEAM skills (Science, Technology, Engineering, Arts, and Mathematics skills) and entrepreneurial skills

5. Maintain and improve transportation infrastructure, consistent with smart growth principles

6. Maintain and improve utility infrastructure, including broadband and energy infrastructure, consistent with smart growth principles and with green infrastructure principles

7. Develop, improve, and expand industrial sites, acreage, parks, and buildings (“shovel readiness”), consistent with smart growth principles

8. Improve communities through initiatives including downtown revitalization and building renovation / redevelopment; development of more sustainable neighborhoods and walkable communities; brownfield remediation and redevelopment; protection and restoration of water resources, waterfronts, open spaces, and habitats; enhancement of public access to waterfront areas; and enhancement of recreational / tourism assets

9. Incentivize and catalyze innovation, technology transfer, and adoption of new technologies

10. Provide adequate and innovative development finance resources and technical assistance as needed to catalyze and incentivize (new and existing) private sector business development

11. Assist in the retention and expansion of existing regional businesses

12. Attract new businesses to the region

13. Maintain and improve the region’s cornerstone and community-based and civic institutions and quality of life assets, capacities, and services to improve area quality of life

14. Encourage, at the community, county, and regional levels, comprehensive and strategic economic development planning; and develop and implement community and economic development projects consistent with those plans and with smart growth principles and sound environment principles

15. Improve quality of life assets that impact economic development

16. Improve collaborative leadership, including increased strategic comprehensive planning and economic development planning and project implementation; enhanced levels of partnership and collaboration; increased investment in business development / business assistance capacity, entrepreneurial development, and innovation; and innovation with respect to government operating practices

17. Capture the potential of the Seneca Nation of Indians as a driver of economic development

18. Improve economic resilience in response to natural disasters and other (non-natural) disasters

It is Southern Tier West’s hope that in the months and years to come, this refocusing of strategic emphasis onto developing a more regional-net-export-surplus, knowledge-based, innovation-based economy will lead to a broader portfolio of strategic economic development initiatives (i.e., projects and programs) designed to build on regional strengths and enhance regional competitiveness. This paradigm shift will require forward thinking and a willingness to invest in the future by building capacity and enhancing regional assets. This paradigm shift should result in:

- The conceptualization and implementation of higher-impact economic development projects and programs.
- An improved consensus approach to selecting the highest impact projects and investing resources in their implementation.
- Increased success in our shared regional economic development mission, which will be reflected in an increased economic growth and an improvement in economic indicators.
It will be a challenge in our rural, economically challenged region, which often must limit the expenditure of its financial resources to essential services, programs, and initiatives, to bring about an evolution of the region’s economic development paradigm. Future returns from building economic development capacity initially may not seem as guaranteed or even as intuitive as a case-by-case development focus on immediate opportunities. However, it is Southern Tier West’s hope that this CEDS will encourage an ongoing regional dialogue that will result in a shared consensus that capacity building is essential to the region’s economic future. As this vision becomes more generally accepted and incorporated into our regional strategy, our region will become a national leader in making progress toward becoming a rural region with a healthy, competitive, and sustainable economy.

In developing this CEDS, Southern Tier West is pleased to play a coordinating and catalyzing role in helping to guide the region’s future.

- September 2020

Southern Tier West Regional Planning and Development Board

H. Kier Dirlam, Chairman

Richard Zink, Executive Director

Thomas Barnes, Senior Regional Economic Development Coordinator
Summary Background

Summary description of the current economic development situation of the Southern Tier West region of New York State (Chautauqua, Cattaraugus, and Allegany Counties), comprised of the northern-most counties in the federally designated Appalachia region. The region’s economic situation is consistent with this designation.

Population

- Decreasing **population** in all three counties and major metro communities, in contrast to increasing State and national population.
- Ongoing **outmigration** of population, including especially the young, working-age segment of the population, the high-skill white collar/professional worker segment of the population, and the college graduate segment of the population. Residents are leaving primarily in search of employment elsewhere. The loss of manufacturing jobs also is causing skilled manufacturing workers and even lower skilled workers to leave.
- Ongoing **aging** of the region’s population / increasing dependent population (particularly the 65+ age cohort) as a percentage of total regional population. Results include a smaller labor force, a growing public assistance burden, and a less attractive economic development environment.
- Ongoing increase in both **racial diversity** and **diversity of origin**.

---

**Labor Force**

- **Decreasing labor force size**, in contrast to increasing State and national labor forces.

- **Ongoing aging of the labor force.** As aging workers retire, it will be difficult to replace them in terms of experience, overall productivity, and working culture.

- **High relative levels of attainment of high school education** and associate's degree are positives. The low incidence of bachelor’s degree or advanced degree presents an obstacle to attracting employers requiring a high-skill labor force to the region.

- **Labor supply surplus** of unutilized and underutilized workers and a **productive work force** with a good work ethic.

- **Shortages of skilled labor** in specific occupations and skills sets (manufacturing and trades sector skills, computer skills, advanced manufacturing/STEM skills, soft skills).

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates; calculations by Southern Tier West

Employment / Unemployment

- Since 2000, **regional** employment has been decreasing, in contrast to increasing employment at the State and national levels. The most significant regional employment **sectors** as of 2017 are Government; Education and Health Services; Trade, Transportation, and Utilities; Manufacturing, and Leisure and Hospitality.

- The region’s **unemployment rate** often has exceeded the unemployment rate of both the State and nation, and this has been uniformly true since 2012.

- The region has a significant amount of **under-employed** labor force due to job dislocations and the regional economy’s shift away from high-skilled, high-wage manufacturing jobs.

- The **2020 coronavirus pandemic economic downturn** has resulted in a substantial amount of additional unemployment.

Income Levels

- Historically, per capita personal income in the region’s counties has been uniformly lower than State and national per capita personal income levels. Adjusted (i.e., real dollar) per capita personal income continues to be around two-thirds to three quarters of the national rate.

- Median household income has been decreasing. Average sectoral wage levels historically are lower than analogous average sectoral wage levels in other parts of the State. The region’s individual and family poverty rates are above State and national levels. The region also is experiencing relatively high public assistance and income assistance burdens.

Natural Environmental Assets and Issues Profile

- **Good environment quality**, but facing threats including air, soil and water **contamination**.

- The region’s physical **environmental assets** that provide economic opportunity include outdoor recreational assets; climate, arable soils, and land available for cultivation: water resources; timber resources; and oil, gas, gravel, and mineral resources. The region’s **primary land uses** include forest/woodland and agriculture. There also is an opportunity for increased development of specific appropriately managed eco-tourism opportunities.

- **Actual or potential threats** to the ongoing availability of physical environmental assets and resources, from both quality of life and economic development perspectives, include pollution (example: Chautauqua Lake), sprawl, overutilization, and inappropriate utilization.

- The region’s short growing season can constrain or prohibit certain types of **agricultural crop production**. However, certain crops are economically feasible to cultivate, and certain types of agricultural sector activity, e.g., livestock and timber, thrive in the region’s climate. Winters can be harsh, negatively impacting transportation and increasing heating and business operating costs.

- The region is located within a day’s travel of large northeastern metropolitan areas, placing the region in **proximity to a large domestic market**. However, transportation to the extra-regional domestic market still is required, which takes time and imposes additional costs when compared with competing businesses located inside larger metropolitan areas. Additionally, the distance from urban areas in the past has contributed to difficulties in attracting certain types of skilled labor. The proximity of the region to the larger Buffalo metro economy exerts significant impact on the region’s economy.

**Built Environment Assets (i.e., infrastructure and other man made assets) and Issues**

- Most of the region’s population centers (cities and villages) are served by some combination of water, sewer, telecommunications/broadband, natural gas, electricity, steam, transportation modes, etc. Certain communities have issues with utility **infrastructure service capacity** and maintenance, which in some instance can constrain business development.

- **Telecommunications and broadband infrastructure** are significant and essential drivers of economic development in the region and also with respect to improving and maintaining global competitiveness. There are deficiencies in the regional broadband infrastructure and service levels.

Source: U.S. Census Bureau, 2015 American Community Survey 1-Year Estimates; percentage calculations by Southern Tier West

- **Electricity** is available throughout the region, but **natural gas** service is not available in the more rural areas of the region. New York State’s energy costs historically have exceeded those of other states.

- The region’s distance from metropolitan centers, primary passenger airports, and global ports requires an efficient and high quality inter-regional **passenger and freight transportation system**. The region’s large
geographic size and low population density also requires an efficient intra-regional passenger and freight transportation system. The region is served by two interstate highways, a network of federal, state and local highways, two Class 1 rail lines and three short line rail lines, one airport with scheduled passenger service, several general aviation airports, and an evolving mobility management (public transportation) infrastructure. There have been ongoing improvements to the region’s highway, freight railroad, air, and mobility management infrastructure; continuing deficiencies need to be addressed through appropriate planning and investment, so as to effectively serve residents and the existing institutional and business communities, and to catalyze additional economic development. Additionally, the ongoing expense of transportation system maintenance is an issue.

- Educated and skilled people and high-growth companies are mobile and can locate virtually anywhere. Other things equal (e.g., economic opportunity, presence of family, access to cultural amenities, etc.), they often choose to locate in regions that value connected, safe, convenient and healthy places to live, work, and do business. Connectivity requires basic infrastructure (e.g., strategic transportation links and information technology connections), but it also requires networks among people, that is, “civic spaces” in both the physical environment sense and the non-physical environment sense. There is an opportunity in the region for additional development of both enhanced connective infrastructure and networks.

- Many communities in the region have downtown centers that continue to be idyllic small town environments for living and working. However, many communities are experiencing threats to their downtown business districts, including urban sprawl and the migration of downtown retail and service business out of downtown business districts, the entry of “big box” and other non-locally-owned competitors into local marketplace, and online commerce. Consistent with smart growth principles, the region needs to concentrate economic and community development initiatives toward preserving and enhancing the vitality and centrality of these downtown centers.

- There has been a trend toward increased levels of planning at the community and county level in recent years. This process is extremely important, as it creates a shared local consensus about direction and strategies and can provide a list of priority strategic initiatives for achieving the goals of the comprehensive plan.

- The region’s crime rate is low relative to that of more urban areas. However, there are public safety concerns, due to higher levels of drug use and associated crime, and higher incidence of gang activity.

- Median housing prices are significantly lower than State and national median housing prices. The region has a more stable housing market than the State and nation as a whole. However, some factors indicating some weakness in the region’s housing market include low relative median housing prices, a historically slower relative housing turnover rate, an aging housing stock (older than State and national housing stocks), and lower relative new housing construction rates. Also, many residents spend more than 35%+ of their income on housing costs.

---

**Note:** The data in the table represents various statistical measures relevant to housing units in a specific region. The values provided include counts, percentages, and median values for different categories such as income levels, mortgage status, and monthly costs as a percentage of household income. The data is crucial for understanding the economic conditions and housing affordability in the area.
Regional residents typically have access to high quality health care, either within the region or by traveling to larger municipalities outside the region. However, certain more rural communities are underserved by comprehensive health care services. Certain health care institutions in the region face ongoing challenges to their viability and competitiveness in response to the dynamics of technology advances and insurance and regulatory environments. In certain areas, there are shortages of certain health care providers, e.g., doctors, nurses, and specialists. Health care costs increasingly are a burden to regional employers and residents. There remain significant local opportunities for improving health care access across the region.

Improvements are needed with respect to educational performance at the primary and secondary levels, and with respect to preparing residents for current and future jobs. There is room for increased emphasis on STEAM education and entrepreneurial education. The region also should encourage obtaining post-secondary bachelors and advanced degrees to improve the workforce. Certain of the region’s post-secondary institutions are centers of technology research (e.g., ceramics, advanced materials, etc.), which could lead to business development through technology transfer and thorough preparation of the future labor force for jobs in technology-based businesses and in sectors that will or at least may develop from emerging technologies.

Data Source: U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates, Selected Housing Characteristics
The region has a significant number of recreational and cultural assets that contribute both to quality of life and economic development, but also has underutilized these assets.

The region has significant historical and cultural assets. Historic preservation and investment in these assets will encourage economic development (tourism).

Overall, the region enjoys a positive and attractive quality of life, with an attractive small-town rural lifestyle, engaging cultural and recreational resources, low-crime rates, a relatively clean environment, stable housing markets, and relatively high quality health care. However, as a consequence of the ongoing structural changes that the region is experiencing, certain cornerstone institutions (e.g., hospitals, schools, and other community institutions) face threats from decreases in population and standard of living.

Sprawl growth is an issue. The region must embrace smart growth principles to limit sprawl.

It is to our region’s advantage to identify sources of extra-regional supply chain leakages and attempt to promote fulfillment of supply chains from internal regional sources, to the extent possible. The greatest impact will result from working with regionally significant industry clusters.

New York State remains a relatively high-cost business operating environment. The most commonly heard complaints relate to taxes, workman’s compensation, and environmental regulations. At the local level, local laws or circumstances that are impediments to business operations should be attempted to be resolved.

There is an ongoing need for increased availability of private and public equity and debt capital to support entrepreneurship and business development in the region. The financial wherewithal of municipalities to repay new debt financing historically has constrained many municipalities from undertaking community and economic development projects.

Global competition and general macroeconomic conditions have negatively impacted the region’s economy in both the longer and shorter terms, resulting in job losses, business closures, and increased absentee business ownership. Non-local business ownership contributes to less corporate commitment to local business operations within the region.

Emerging or Declining Clusters / Industry Sectors

The region has been undergoing a transformation from an economy featuring many high-skill, high-wage unionized jobs to an economy that features an increasing number of relatively low-skill, low-wage service and commercial employment, often part-time in nature and offering few benefits, such as health insurance and retirement benefits. The region’s manufacturing sector is experiencing an ongoing employment decline. There has been significant outsourcing of manufacturing production and jobs both domestically and overseas. Since manufacturing is a primary value-added sector, with regional exports bringing new wealth into the region, a decline in this sector erodes the region’s standard of living. The growing services and trade sector often features jobs are part time or seasonal jobs with no benefits, eroding incomes. Further, much of the region’s services and trade sector does not involve regional export activity, and thus does not bring new wealth into the region.

The region’s most significant industry clusters are machinery manufacturing; fabricated metal product manufacturing; glass and ceramics; agribusiness, food processing and technology; and forest and wood products. The counties also consider the tourism sector to be a significant economic cluster. These industry clusters represent very significant competitive advantage assets (i.e., target clusters) for economic development.

The region’s most significant occupation clusters are agribusiness and food technology; primary/secondary and vocational education, remediation and social services; postsecondary education; public safety and domestic security’ personal services occupations, skilled production workers, and health care. The region should develop strategic initiatives to improve the regional workforce’s knowledge and technology skills, and also develop initiatives that focus on occupational cluster strengths, particularly where there are strong industry clusters as well.
• A **cluster-based economic development strategy** would direct resources to the vertically and horizontally integrated cluster, building networks, strengthening individual firms and supply chains, and improving the cluster-specific labor force. The approach should include developing communication and consensus between industry cluster members, the economic development community, and the educational and job training community; the facilitation of technology adoption and improvements by the cluster; and the enhancement of labor force skills.

**Innovation Assets**

• The region has a lower **capacity to innovate** ("Innovation Index") than the state and nation as a whole, meaning that the region is less prepared and capable to generate innovation-based economic development, which is essential for a healthy economy over the long-term. This is manifested in inadequate levels of entrepreneurship, technology transfer and adoption, and export activity.

• **Human capital (labor force) innovation shortcomings** include a low incidence of bachelor’s degrees amongst the region’s residents, a significantly higher rate of decrease in the region’s population of younger working age persons (ages 25 to 44), a lower percentage representation of high-tech employees in the employment base, and a lower tech-based knowledge occupation cluster employment share. **Economic asset innovation shortcomings** include the unavailability and/or lack of use of venture capital for business ventures in the region, low broadband penetration rates, low rates of establishment churn in the region, a lower incidence of small-sized businesses establishments as compared to the state, and a higher incidence of large establishments as compared to the state.

• The region does have certain **significant assets** (e.g., colleges, incubators, and manufacturer’s associations and consulting organizations) that could **catalyze innovation**, and certain specific ongoing and proposed initiatives in the region (e.g., productivity, entrepreneurship, workforce development, incubators, industrial parks, and technology transfer and commercialization centers) that are intended to enhance innovation rates.
SWOT Analysis

SWOT is an acronym for Strengths, Weaknesses, Opportunities, and Threats. EDA encourages regions to create the strategic content of their CEDS (i.e., economic development goals, objectives, strategies, and projects) based upon a SWOT Analysis. The following is the regional view of the Southern Tier West region’s economy’s strengths and weaknesses, and the economic opportunities and threats that the region faces. Each of the four SWOT elements are subdivided into five sub-categories: (1) human capital, (2) traditional and non-traditional infrastructure, (3) innovation and entrepreneurship, (4) quality, connected places, and (5) collaborative leadership.

Regional Strengths

1. **Human Capital:**
   - Presence of a labor force with certain skills
   - Presence of a high productivity labor force, including workforce quality and workplace practices
   - Educational attainment
   - Education and employee training system
   - Slowing outmigration rate

2. **Traditional and Non-Traditional Infrastructure**
   - Strategic location of the region
   - Transportation infrastructure
   - Information and communication technologies (broadband, wireless)
   - Significant natural resource base and physical development assets
     - Farmland and agricultural resources (climate, soils, and topography)
     - Forest assets
     - Water resources:
       - Marcellus and Utica shale gas resources
       - Solar energy resources
       - Geothermal energy resources
       - Wind energy resources
       - Biomass / Biofuels resources
       - Lake Erie coastland asset
   - Tourism assets
   - Significant manufacturing base
   - Significant industry clusters
   - Significant occupation clusters
   - Growth sectors (education and health services sector, the professional and business services sector, the leisure and hospitality sector, and other services)
   - Diversification of industry sectors
   - Business acumen
   - Technical / technology acumen and resources
   - Global linkages
   - Significant support of economic development by local foundations
   - Presence of the Seneca Nation of Indians

3. **Innovation and Entrepreneurship**
   - Entrepreneurial capacity
     - Non-technical business assistance providers (e.g., business planning assistance, etc.)
     - Business incubators
     - Business development programs
4. **Quality, Connected Places**
   - Livable, walkable, smaller communities
   - Low crime rates
   - Affordable cost of living
   - Clean environment
   - Recreational and tourism assets
   - Cultural assets
   - Historic assets

5. **Collaborative Leadership**
   - Willingness to collaborate and rationally seek solutions to problems and achieving goals
   - Increased level of collaboration and services and equipment sharing amongst municipalities in the region
   - Many community and industrial leaders have a strong "pride of place" commitment to region
   - Amenability to transformational change
   - Indications of willingness to consider proactive investment in economic development
   - Ongoing commitment to strategic planning and the county and municipal level

**Regional Weaknesses**

1. **Human Capital**
   - Structural population and labor force changes
     - Population loss
     - Aging of the population
     - Outmigration of the population, especially the younger demographic
     - Smaller, less skilled regional labor force.
   - Inadequate regional educational attainment
     - High level of attainment on individuals with associate’s degrees
     - Too high a percentage of individuals with a high school diploma or less
     - Too few individuals with bachelor’s or advanced degrees
   - Inadequate supply of a highly skilled, technically trained workforce in many job titles.
   - Labor force productivity issues
   - Low per capita income and high poverty rate

2. **Traditional and Non-Traditional Infrastructure**
   - Physical infrastructure constraints to development
     - Lack of service in rural areas
     - Aging systems / costly to maintain
     - Capacity issues
     - Cost of service
   - Capital market constraints to development
     - Private equity capital (both entrepreneurial capital and venture capital)
     - Private debt capital
     - Public debt and equity capital
   - Inadequate global linkages
     - Need for more private sector connection to global economy
     - Less-than-optimal rates of collaboration and participation of regional businesses with the region’s
university community with respect to export activities
  o Less-than-optimal participation of the foreign world at large with the region’s universities and colleges with respect to research and business development activities

3. Innovation and Entrepreneurship
   • Inadequate regional innovation capacity and activity
     o Inadequate research and development enterprise capacity
     o Inadequate technology commercialization competence and activity
     o Inadequate innovation culture
     o Inadequate networking opportunities
   • Inadequate regional entrepreneurial capacity
   • Barriers to entry
   • Productivity and competitiveness issues

4. Quality, Connected Places
   • Quality of life forces and issues
     o Need to preserve and reinvigorate main streets and downtown business centers (Community Centers) to avoid sprawl, improve quality of life, and reduce the cost of service provision. Includes:
       • Redevelopment and repair of downtowns
       • Enhanced commercial and services provision
       • Increased availability of housing stock in downtowns
       • Address high commercial vacancy rates in downtowns
       • Create and improve creative districts within communities
       • Increase amenities within communities
       • Increase the walkability of communities
       • Increase the relationship within communities of the built environment and the natural environment (e.g., public parks space and green space, trails, etc.)
     o Need to improve many community institutions, including hospitals/emergency care facilities, schools, fire departments, community buildings, religious organizations, housing and housing organizations, social service organizations, libraries, parks, cultural institutions (e.g., museums and community arts centers), community foundations and other locally-focused philanthropies, volunteer associations, cooperatives, primary private sector businesses (e.g., groceries, pharmacies, gas stations, etc.), man-made and natural recreational assets, and even virtual organizations and networks
     o Need to further develop the region’s recreational infrastructure and make older communities walkable to facilitate healthy activities and lifestyles
     o Need to increase public and private support for the region’s cultural assets and cultural life
     o Need to improve housing and building stock, including:
       • Addressing increasing housing and building stock age
       • Increasing new housing and building stock construction rates
       • Addressing substandard and non-code-compliant housing
       • Increase variety of alternative types of housing options
       • Address the increasing prevalence of manufactured and/or mobile housing
       • Address the increasing conversion of large homes to apartments
       • Address housing stock affordability issues
       • Address absentee ownership of rental properties
       • Address the need for architectural preservation
       • Increase the rate of adaptive reuse
     o Need to promote energy conservation improvements
     o Need to improve public education through investment and, in some cases, consolidation and sharing
     o Need to improve health care throughout the region, including
• Improving health care outcomes throughout the region (e.g., high teen pregnancy and smoking rates, chronic disease, and childhood and adult obesity)
• Need to transition from a disease management focus to a prevention focus
• Address obstacles to recruitment and retention of doctors and other health care workers
• Address access issues in smaller communities (e.g., access to hospitals, emergency care facilities, specialist, and even local doctors)
• Need for improved transportation options to help people travel to appointments
• Address the shortage of funds to improve aging and out-of-date hospitals and nursing homes

  o **Marcellus and Utica shale gas extraction** may prove problematic to local/regional water quality
  o **Overuse or inappropriate land development and certain business practices** may threaten the carrying capacity of the natural environment
  o **Need for conservation of natural resources and agricultural lands**
  o **Social capital** (the resources of the “social infrastructure” of community organizations and volunteer groups engaged in activities to benefit the community) may be becoming stretched
  o **Negative and divisive community attitudes** - political, geographic, ethnic, racial, attitudes toward government and business communities, public apathy, etc.

• Other Structural Forces and Issues

  o **Coronavirus pandemic economic downturn**, leading to business downsizing/suspensions/closures, and ultimately layoffs
  o **Burdensome business climate** - corporate and personal income tax burdens, regulatory and compliance requirements, workman’s compensation burdens, utility costs, winter heating costs, high transportation costs, rising health care costs, etc.
  o **State and local government issues**, including:
    • Too many layers of government
    • Need to reduce/consolidate/share services
    • Inadequate government service delivery, in part a function of a shortage of local government financial resources and staff capacity
    • Governmental operating costs, including rising health care costs, State pension fund costs, etc.
    • Unfunded State mandates
    • Regulatory and compliance requirements
    • Slow rates of government innovation and adoption of technology
    • Inadequate level of collaboration in the region between government and other sectors of the economy (including collaboration between government and the educational community, economic development organizations, workforce development organizations, and the business community).
  o **Labor force climate and legal environment**, i.e., the perception that the statewide labor force and labor legal environment (unions, labor laws, regulations, etc.) both may be obstacles to business development
  o Need to **externalize entrepreneurial/innovation support** whenever it is practical so as to grow the innovation support community and catalyze innovation and entrepreneurship.
  o **Macroeconomic issues** (general macroeconomic conditions, global competition, the transition away from manufacturing, the downturn in agricultural prices, global political and financial instability, etc.) constrain economic development.
  o **There are pockets of distress in the region’s communities**, both large and small, which constrain economic activity and economic development.
  o **Perceived potential regional image problems** (“an economically devastated rural backwater that has limited potential for economic development”) may contribute to the region’s difficulty in attracting firms, skilled workers, students, and visitors, and that discourages our own residents. The region needs to develop a better image, both externally and internally, so that it can move beyond this defeatist external perception and self-image.
5. **Collaborative Leadership**

- **Inadequate levels of proactive** (i.e., not reactive) government strategic economic development practices focusing on common long-term/sustaining goals.
- **Shortage of local government financial resources and staff capacity** to undertake economic development initiatives.
- **Inadequate strategic economic development planning**, resulting in the lack of a portfolio of prioritized economic development initiatives, and the lack of designation and appropriation of capital funds to implement these initiatives.
- **Inadequate governmental focus (at all levels) on collaboration** with each other and with other sectors, including larger and smaller companies; public, private, and philanthropic sectors; academia and industry; "old" and "new" sources of wealth within the region; and the broadest possible composition of community by several socio-demographic characteristics (i.e., diversity).

**Regional Opportunities**

1. **Human Capital**

   - **Opportunities for economic development that are created by the region’s labor force:**
     - Focusing strategic initiatives on significant regional occupation clusters
     - Linking available and displaced workers to employment and entrepreneurship opportunities

   - **Opportunities to further develop the region’s labor force:**
     - Retention and employment of the region’s college graduates
     - Expansion of apprenticeship programs
     - Expansion of mentoring programs
     - Establishment of a regional sourcing portal for job and training opportunities
     - Increase support and accessibility for on-the-job training
     - Focusing job and training opportunities on local workers
     - Creation of transferable skill training programs
     - Investment in career talent pipeline initiatives
     - Investment in entrepreneurial development
     - Enhancing STEAM education

2. **Traditional and Non-Traditional Infrastructure**

   - **Investment in traditional physical infrastructure** consistent with “smart growth” principles
   - **Expansion and / or improvement of non-traditional physical infrastructure**, including:
     - Specialized space, dedicated equipment, information and communication technologies, business networks, linkages to the education/research/labor force training system, and logistics
     - Encouragement of the development of physical facilities geared toward technology-based businesses, including specialized shared-use physical facilities, especially as regards technology development (i.e., prototype development, shared testing and manufacturing equipment, test beds, etc.), shortage of diverse and affordable physical space with specialized amenities (e.g., broadband, shared conference space, shared operating and office equipment, etc.).

   - **Investment in shovel readiness**, including site development / industrial park expansion / infrastructure expansion / permitting / development along rail and highway corridors and broadband backbone corridor / interstate interchange development / spec building development

   - **Downtown revitalization and building renovation / redevelopment**

   - **Development of more sustainable neighborhoods and walkable communities**

   - **Brownfield remediation and redevelopment**

   - **Encouragement of “green infrastructure”**

   - **Implementation of sustainable energy improvements** from the Western New York Regional Sustainability Plan

   - **Protection and restoration of water resources, waterfronts, open spaces, and habitats**
3. **Innovation and Entrepreneurship**

- **Target industry clusters**
  - Target industry clusters include:
    - Machinery manufacturing
    - Fabricated metal product manufacturing
    - Glass and ceramics
    - Agribusiness, food processing and technology
    - Forest and wood products
    - Tourism
    - Value-added export service sectors, including personal service occupations and medical occupations (e.g., therapy, counseling, and rehabilitation occupations, etc.)
  - **Target industry cluster development strategies** could include:
    - Catalyzing the creation of additional value-added vertical supply chain and horizontal complementary companies in the relevant significant industry clusters and significant occupation clusters.
    - Encouraging and incentivizing the attraction or local development of food processing businesses utilizing local food producing resources and transportation infrastructure.
    - Encouraging and incentivizing the attraction or local development of secondary forest products processing businesses utilizing local forest producing resources and transportation infrastructure.
    - Encouraging and incentivizing the attraction or local development of glass and ceramics manufacturing businesses utilizing technology and research capacity.
    - Catalyzing tourism development through:
      - Expansion and improvement of public tourism destination facilities, recreational assets (including waterfront accessibility), and festivals / events (number and variety)
      - Encouraging and incentivizing privately owned tourism destination facilities and recreational assets
      - Revitalizing downtowns, creating special districts (e.g., arts, entertainment, specialized shopping, etc.) and improving walkability
      - Improving accessibility and wayfinding
      - Developing or improving gateway, visitor, and information centers that provide comprehensive information needed by tourists
      - Expansion and improvement of publicly owned, privately owned, and non-profit cultural and historical organizations, community assets, and programs
      - Incentivizing the expansion and improvement of the tourism, recreation, and leisure support sector
      - Regional and localized tourism branding/utilization
      - Expanded tourism marketing (including specialized marketing, such as coordination of multiple complementary and cross-sectional events and facilities, eco-tourism, arts tourism, recreational tourism, etc.) and enhanced development of a related business ecosystem
      - Increased coordination between destinations and events and the support sector
      - Increased coordination of regional event scheduling (to encourage extended visitor stays)

- **Entrepreneurship**
  - Development of an entrepreneurship and innovation culture through recognizing, supporting, incentivizing, and celebrating entrepreneurship and innovation
  - Creation of a formalized system of cluster-based business and entrepreneurial networks wherein members in a cluster (e.g., businesses, educational institutions, trade groups, employee
organizations, etc.) can interact in an environment that fosters synergies and connections, including the scheduling of meetings (scheduled participatory talks on specific topics, delivering programmatic assistance, etc.), provision of meeting space and encouraging and incentivizing attendance and participation, creation of mentoring and ambassador programs, and creation of virtual meeting and networking spaces.

- Increased entrepreneurship education at all levels (e.g., primary and secondary education, colleges, and adult education)
- Expanding and enhancing non-technical entrepreneurial and small business assistance resources and providers (e.g., business planning assistance, etc.) and business development programs, and encouraging the utilization of these assets
- Enhancing entrepreneurial funding vehicles
- Increasing links between colleges and economic development organizations and private industry
- Encouraging incubator development/expansion
- Undertaking a regional business plan competition

- **Innovation**
  - Technology transfer and commercialization opportunities, consulting, contract research, short courses/workshops/conferences/other professional development opportunities to promote workforce development, etc., in conjunction with Alfred University and other regional and non-regional centers of technology research and development
  - Expanded and enhanced productivity enhancement programs and resources

- **General business development opportunities**
  - Improving regional business capital market accessibility, through:
    - Creation and expansion of various stage private and community venture capital funds
    - Expansion of revolving loan fund capitalization
    - Increased utilization of loan guarantees to leverage commercial bank financing
    - Assistance to businesses with accessing private and public funding sources
  - Expanded and enhanced productivity enhancement programs
  - Expanded small business and entrepreneurial assistance resources
  - Enhancement of export activity, through:
    - Facilitation of export assistance from federal and other sources
    - Export mentoring by regional businesses currently involved in exporting
    - Increased collaboration and participation of regional businesses with the region’s university community with respect to export activities
    - Increased financial assistance to support export activity
    - Foreign outreach events
    - Assistance with developing export marketing materials
    - Assistance with export research
    - Assistance with export transportation logistics and foreign regulatory issues
  - Encourage and incentivize the development of internet-related, location-neutral, broadband-dependent businesses.

4. **Quality, Connected Places**

- Increase regionalization of infrastructure services so as to improve cost efficiencies in local service delivery.

- **Community centers**
  - Preserve and reinvigorate main streets and downtown business centers to avoid sprawl (“smart growth”), improve quality of life, and reduce the cost of service provision
  - Redevelopment and repair of buildings and public spaces, catalyzing commercial and services providers to locate in downtowns
  - Increase the availability of housing stock in downtowns
  - Create and improve creative districts
  - Increase walkability and wayfinding
- Improve the relationship within communities of the built environment and the natural environment (e.g., public parks space and green space, trails, etc.).

- **Community institutions**
  - Stabilize and grow community institutions
  - Address any gaps in the presence of community institutions in the region’s communities.

- **Recreation assets**
  - Further develop the region’s privately and publicly owned recreational infrastructure
  - Make older communities walkable

- **Cultural assets**
  - Provide greater public and private support for the region’s cultural assets and cultural life

- **Housing and building stock**
  - Catalyze new construction and repair / renovation
  - Incentivize increased variety of alternative types of housing options to meet varied individual tastes and requirements
  - Remove blight
  - Reduce absentee ownership of rental properties
  - Incentivize energy conservation improvements and adaptive reuse
  - Incentivize increased supply and variety of the region’s commercial building stock through adaptive reuse, renovation and repair, and speculative building construction

- **Public education**
  - Consolidate schools and increase sharing to avoid potential duplication of services and high costs of education provision while making it easier to deliver state-of-the-art education services and facilities. Charter and private schools also are alternatives that can be considered.

- **Health care**
  - Enhancing the recruiting and retaining of doctors and other health care workers
  - Improving aging and out-of-date hospitals and nursing homes
  - Improving access to hospitals, emergency care facilities, and even local doctors in smaller communities
  - Transitioning from a disease management focus to a prevention focus
  - Reducing teen pregnancy and smoking rates, chronic disease, and childhood and adult obesity through obtaining additional funding to support chronic disease prevention programs
  - Improving access to specialists in the region
  - Improving transportation options to help people travel to appointments
  - Encouraging active lifestyles by creating walkable communities

- **Environment and conservation practices**
  - Encourage and require proper conservation practices
  - Implement and maintain floodplain regulations requirements to protect first flush from storms to impact structures and water quality
  - Limit overuse or inappropriate land development
  - Regulate certain potentially damaging business practices
  - Encourage sound business and government environmental and conservation practices
  - Limit inappropriate development patterns and infrastructure design.

- **Social capital**
  - Encourage the development of the resources of the “social infrastructure” of community organizations and volunteer groups engaged in activities to benefit the community.

- **Improvement of community attitudes**
  - Improve certain negative and divisive community attitudes (including political, geographic, ethnic, and racial divisions) that negatively impact quality of life in the region
  - Reduce the amount of government through centralization, regionalization, and shared services
  - The region should market to itself to improve self-image and reduce public apathy and negativity.
5. **Collaborative Leadership**

- **Strategic comprehensive planning and economic development planning**, including:
  - Prioritized strategic economic development initiatives
  - Designation and appropriation of sufficient capital resources to implement these initiatives
  - Systemic investment in these targeted economic development initiatives

- **Enhanced levels of partnership and collaboration** between units of government and between government and the business community (including larger and smaller companies); the educational community; economic development organizations; workforce development organizations; public, private, and philanthropic sectors; and diverse communities within the region.

- **Investment in business development / business assistance capacity**, especially regarding target clusters, entrepreneurial development, and innovation.
  - **Target clusters**:
    - Focus on, talk about, encourage, incentivize, facilitate, recognize, and celebrate the region’s significant industry and occupation clusters
    - Develop and implement cluster-based economic development initiatives that help build these clusters and incentivize further development within these clusters
  - **Entrepreneurship**:
    - Focus on, talk about, encourage, incentivize, facilitate, recognize, and celebrate entrepreneurship
    - Create a regional identity or brand that focuses on entrepreneurial activity and engage in regional marketing of that brand as a means of encouraging entrepreneurship
    - Tell entrepreneurial success stories in regional media outlets as well as social media outlets (blogs, tweets, etc.) so that these stories become known widely throughout the community and region
    - Position the region as a home for entrepreneurs, creating a "sense of place" with well-publicized locations of entrepreneurial activity (e.g., incubators, virtual networks, districts, etc.) and discernable nodes of creativity/activity/establishment churn
    - Seek to be recognized as a hotbed of entrepreneurial activity.
  - **Innovation**:
    - Focus on, encourage, incentivize, facilitate, recognize, and celebrate innovation
    - Cross-fertilization of sectors (e.g., the business community, academia, economic development organizations, etc.) for innovation
    - Problem solving and creation of solutions and opportunities by participants from different business groups and industrial sectors

- **Governments at all levels need to innovate with respect to operating practices**, including adoption of new technologies and reducing/consolidating/sharing services to promote better service delivery and reduce taxes.

**Regional Threats**

1. **Human Capital**

- **Changing demographics**
  - The region’s aging population will increase the dependent population carrying cost burden and reduce size of productive-age workforce.
  - The region’s population decline and outmigration of its productive age population and youth will constrain economic development. This is in part a “brain drain,” i.e., the loss of individuals with advanced education and specific talents, knowledge, training, and skills from the region. Additionally, some of the region’s younger demographic leave the region to seek their education and/or employment outside of the region.

- **Labor force issues**
  - The region’s labor force is decreasing in size
2. Traditional and Non-Traditional Infrastructure

- **Age of infrastructure**
  - Risk of failure
- **Cost of maintaining, repairing, and improving**
  - May be passed on to businesses, impacting their viability and growth potential
  - Inadequate government financial wherewithal to support maintenance and improvement of strategic infrastructure
- **Potential disasters/dislocations**
  - 2020 coronavirus pandemic economic downturn dislocation
  - Ongoing risks of other economic dislocations caused by natural/man-made disasters, plant closures/downsizing, etc.
- **Innovation and Entrepreneurship**
  - Inadequate regional capacity to catalyze innovation and new business development and growth, especially as regards technology-based, value added, and net export businesses
  - Threat of business relocation to other regions perceived as more friendly or facilitative to their development activities, or which offer greater technical, financial or workforce resources and incentives or less costly operating environments.
  - Threat of absentee ownership: Non-local owners typically are less committed to local operations and may close or relocate operations based upon financial considerations.
  - Inadequate succession planning: Locally owned businesses may be threatened or negatively impacted by inadequate preparation for succession or transition.

3. Quality, Connected Places

- **Rural quality of life**
  - Employees or business owners may decide to relocate based upon personal considerations related to the region’s quality of life.
- **Global competition and competition from other domestic regions**
  - The region faces potential loss of businesses relocating to other areas, and potential downsizing or exit of companies impacted by foreign and domestic competition.
- **Economy**
  - Although there has been somewhat of an improvement in the domestic economy, the regional economy is lagging this recovery.

4. Collaborative Leadership

- **Financial constraints**
  - High cost of provision of government services
  - Too many levels of government (need for consolidation and service sharing)
  - Lower amounts of financial resources available for community projects (including infrastructure maintenance and improvements and economic development incentives)
- **Lack of leadership**
  - Many smaller communities face difficulties with obtaining qualified and committed leaders with vision, expertise, and experience to occupy leadership and governance positions.

**Strategic Implications**

The various economic development issues, strengths, weaknesses, opportunities, and threats discussed above imply a number of strategic directions that the region should embrace in order to remove obstacles to creating a healthy, competitive, and sustainable economy and capture economic development.

While certain issues (e.g., state corporate and personal income tax burdens, state regulatory climate and compliance burdens, state workman’s compensation burdens, macroeconomic conditions, utility costs, winter
heating costs, unfunded mandates, high transportation costs, rising health care costs, high municipal operating costs, labor force and labor legal environment, etc.) are structural in nature and remediating them is beyond the scope of a regional comprehensive economic development strategy, nonetheless there are many strategic steps that the region can take to respond to many of the other economic development problems that it faces.

Similarly, while certain strengths and opportunities may be beyond the realistic capacity of the region to capitalize upon (e.g., owing to financial and political constraints, imperfect knowledge, etc.), nonetheless there are many strategic steps that the region can take to capitalize on many of the economic development opportunities available to it. These steps (18 strategic foci) are enumerated in a subsequent chapter of this CEDS, “Vision / Goals / Objectives / Priority Strategic Foci / Strategies.”
Strategic Target Clusters

This section of the CEDS identifies the industry sectors ("clusters") in which the region has a preponderance of economic activity (strategic industry clusters) or in which the region has significant labor force available (occupation clusters). These clusters have been identified through data-based location quotient analysis. These strategic target clusters are clusters in which the region should direct its economic development investment to have the maximum impact (i.e., asset-based development).

Industry Clusters:
- Machinery manufacturing
- Fabricated metal product manufacturing
- Glass and ceramics
- Agribusiness, food processing and technology
- Forest and wood products
- Arts, entertainment, recreation, and visitor industries (i.e., including tourism)

Occupation Clusters:
- Agribusiness and food technology
- Primary/secondary and vocational education, remediation, and social services (i.e., schools)
- Postsecondary education and knowledge creation (i.e., colleges)
- Public safety and domestic security
- Personal services occupations
- Skilled production workers
- Health care and medical science (therapy, counseling, and rehabilitation)
Economic Resilience

The region’s economic prosperity is dependent upon its ability to prevent, withstand, and quickly recover from major disruptions (i.e., “shocks”) to its economic base. Economic resilience includes the ability to avoid the shock, the ability to withstand a shock, and the ability to recover quickly from a shock. This section of the CEDS deals with economic resilience in terms of economic disruptions (1) arising from natural disasters and (2) arising from other causes. In both cases, the focus should be on both steady state (i.e., avoidance or mitigation or minimization in advance of a natural disaster) and response to a disaster. Additionally, the focus herein is on the economic disruption, as opposed to human safety or property damage or governmental operations, all of which are equally essential (or even more important) and all of which are beyond the focus and limited scope of this CEDS and perhaps more properly the province of other types of public safety plans.

Economic Disruptions Arising from Natural Disasters

The types of natural disasters that could occur in the region include:

- Flood events
- Winter storm events
- Fire events
- High wind events
- Earthquake events
- Pandemic events

Of these types of disasters, flood events and winter storm events are the most common in the region.

The region has a county-level approach to economic resilience with respect to natural disasters. In each county in the region, the County department of economic development and the county industrial development agency have a relationship with the county office of emergency services that involves pre-planning for natural disasters and, once a natural disaster occurs, that provides for a coordinated response to that disaster.

The focus of the county offices of emergency services is planning for mitigating and responding to natural disasters, as they impact both publicly and privately owned assets; governmental, community, and business operations; and the general public. With respect to natural disasters, each county has both a hazard mitigation plan and a hazard response plan.

The hazard mitigation plan in one sense is a function of the FEMA and NYS Office of Emergency Management focus on publicly owned assets. Accordingly, the county hazard mitigation plans focus primarily on preventing or minimizing damage to publicly owned assets in the event of a natural disaster. Economic resilience per se (i.e., with respect to a natural disaster’s impact on private businesses) is not an element of the county hazard mitigation plans. However, damage to publicly owned assets not only can negatively impact governmental or community facility operations; it also can disrupt private sector (business operations). Accordingly, there is a role for county economic development organizations with respect to mitigation planning and assistance to businesses and communities with respect to helping them avoid or minimize the negative impacts of natural disasters on the business community.

Obviously, in 2020 the overriding natural disaster and ensuing economic dislocation is that associated with the coronavirus pandemic. Again, here the region is concerned with economic resiliency. The pandemic has negatively impacted both the public sector (as a result of reduced revenues and social isolation constraints to government operations) and the private sector (i.e., business downsizings/suspensions/closures and consequent layoffs). Economic resilience strategies thus take the forefront in this region as well as in regions across the entire nation.
Economic Disruptions Arising from Other Than Natural Disasters

Other types of economic disruptions can be just as damaging to local and regional economies as can disruptions arising from natural disasters. Economic disruptions typically involve plant closures or downsizings/layoffs or production hiatuses arising from various causes.

Examples of potential causes for these other types of economic disruptions include:

- Persistent internal regional structural issues including:
  - Excessive local dependencies on single employers or industries
  - Non-local ownership of certain major employers
  - Inadequate transportation access/options in some communities
  - Inadequate broadband availability in some communities
  - Labor force issues, including an inadequately educated workforce
  - Barriers to entrepreneurship and small business expansion
  - Inadequate access to small business finance

- Circumstantial issues, typically external but sometimes internal, including:
  - Economic downturns
  - Customer issues (domestic and international)
  - Technological obsolescence or competitiveness issues
  - Labor force issues, including labor stoppages
  - Supply chain issues or interruptions
  - Infrastructure service disruption
  - Water shortages
  - Chemical spills, etc.
  - Climate change

The region must address these types of business risks through both steady state (mitigation or avoidance or minimization) initiatives and response initiatives (once disruptions occur). The following two sub-sections address these two topics.

Steady State Initiatives – Planning for and Implementing Economic Resilience Initiatives

1. Role of businesses in steady state planning and implementation

   A. Identification of primary business risks relating to or caused by natural disasters, for example:
      - Energy supply disruptions
      - Facility damage or accessibility issues
      - Telecommunications or utility service disruptions
      - Etc.

   B. Identification of primary business risks relating to disruptions other than natural disasters, often the result of persistent economic challenges or deficiencies, for example:
      - Plant closures, downsizings, or interruptions of production
      - Reduction of purchasing from local vendors in the supply chain

   C. Development of plans for avoid or minimize disruptions from natural disasters, for example:
      - Backup energy supplies
      - Strengthening potentially physically challenged elements of facilities
      - Improving accessibility infrastructure / accessibility redundancy
      - Telecommunications redundancy
      - Improving utility infrastructure
      - Etc.
D. Communication of risks and plans to communities, county emergency services offices, and economic development organizations

2. Role of communities in steady state planning and implementation

A. Identification of primary business risks relating to natural disasters. Determine which publicly owned assets, if damaged by natural disaster, could disrupt local business operations. Examples are culverts and bridges that are key element of accessibility to business facilities, etc.

B. Participation in county hazard mitigation planning process with respect to these publicly owned assets that, if damaged by natural disaster, could disrupt local business operations. Include mitigation projects relating to these assets in the county hazard mitigation plan so as to avoid disruption of local business operations. Implement these mitigation projects. Project examples could include improving and reinforcing stream channels to avoid flooding damage, GIS database of municipal infrastructure, database of facility utility shut offs, enhancing channel capacity, restoring channel stability, etc.

C. Continuation of safe development practices, including land use/zoning ordinances requiring the location of structures outside of floodplains, stormwater policies that effectively manage stormwater so as not to create potentially disrupting flooding, the preservation of natural lands that act as buffers from storms, flood storage buffers from storms, the protection of community built environments from the impacts of extreme weather, etc.

3. Role of economic development organizations in steady state planning and implementation

A. Creation of network(s) to facilitate active and regular communication between the relevant sectors to (a) collaborate, (b) collect and disseminate information about key elements (such as supply-chain relationships), and (c) ensure that the public, private, education, and nonprofit sectors are aware of each other’s roles and responsibilities with respect to existing and potential future challenges

- County emergency management offices
- County offices of economic development
- County industrial development agencies
- County workforce management office
- Local government officials (CEO, DPW, etc.) of affected communities
- Major employers and cornerstone institutions (e.g. hospitals, colleges, etc.)
- Southern Tier West

B. Creation of a business database

- Database should begin with largest employers
- Database should be GIS-based and served over the web by controlled access
- Data fields should include location, description of operations, description of any hazardous operations or materials, contact information, location of utility services, employee information

C. Identification of primary business risks relating to natural disasters. Recognize and collect business and community mitigation plans and county hazard mitigation plans.

D. Identification of pre-disruptions activities or initiatives that could help avoid or minimize disruptions, for example:

- Working with businesses to encourage off-site storage of critical data
- Working with businesses to encourage redundancy in telecommunications and broadband networks
- Working with businesses to encourage planning to resolve any post-disruption employee accessibility issues
- Working with businesses to identify and implement pre-disaster business activities or initiatives that could complement community or county hazard mitigation plans and projects
• Broadening the industrial base with diversification initiatives, such as targeting the development of significant industrial clusters with growth potential that could provide stability during downturns that disproportionately impact any single cluster or major employer
• Undertaking business retention and expansion programs
• Putting in place a means of availability of surge capital/credit resources in case they may be needed by local governments and/or major employers
• Creating cluster networks, industrial ambassador programs, and financial capital funds to assist businesses with economic recovery post-disruption
• Establishing formalized mechanisms to realign and retrain any displaced workers post-disruption
• Improving workforce skills and cross training
• Tracking establishment “churn” and other data elements

E. Regular preparation of a current assessment of the regional economy, regular monitoring of the state of preparedness to mitigate and respond to disruptions, and regular measurement and evaluation of pre-disaster planning/preparedness and post-disaster response

As a regional resource, Southern Tier West can serve as a source for information; technical, funding, and grantsmanship assistance; provider of GIS services and web-based serving of information; convener of teams for mitigation planning efforts, etc.

Response Initiatives – Planning for and Implementing Economic Resilience Initiatives

The focus of the county hazard response plans is recovery from natural disasters. In the case of the hazard response plan, the contents of the plans are not disseminated publicly, so as to avoid sensitive information becoming available to entities that might engage in terrorist or criminal behavior. However, the plans do include components involving government operations, community institutions (e.g., hospitals, etc.), businesses, and the general public.

In a natural disaster, the county emergency services offices, the police departments (State Police, county sheriffs, and local police), local public works departments, augmented in extreme cases by the National Guard, and other State agencies (Department of Environmental Conservation and Office of Emergency Management), are the first responders and entities that are in charge of the immediate response activity, per a pre-determined hierarchy. Their activities can be supplemented by private sector services, e.g., contractors, etc. Their first concern is human/public safety, followed by property damage. Economic disruptions are the focus of the economic development organizations, which can become involved with working with businesses and communities as soon as it is safe to do so.

1. Role of economic development organizations in response planning and implementation

   The county economic development organizations should convene planning meetings with stakeholders (including the business community, community leaders, police, and public works officials, etc.) to determine appropriate procedures and/or protocols for responses. This already is in place for natural disaster; if it is not present, this planning also needs to be put in place for other types of economic disruptions. Protocols should include:

   • The general process for economic response to natural disasters is that county economic development organizations are informed of disaster, and then develop a team comprised of primary stakeholders, including community officials, key personnel from the business community, and others as needed. Roles and responsibilities are assigned, and key response actions are identified and implemented. Regular communication occurs between team members, so that additional issues can be addressed as they arise.

   • Economic development organizations should serve as an information hub (collecting data and convening the appropriate players to facilitate recovery post-disruption) and a Business Emergency Operation Center (BEOC) or Business Recovery One-Stop Center. Economic development organizations should utilize information networks among the various stakeholders in their counties for active and regular
communications to collaborate on response initiatives, determining business and community needs, and monitoring of implementation of response.

- Economic development organizations should assist communities and businesses with undertaking response projects. Assistance can include (but should not be limited to) help with accessing funding, contacting elected officials and regulatory officials, working with workforce organizations, etc.

As a regional resource, Southern Tier West can serve as a source for information; technical, funding, and grantmanship assistance; provider of GIS services and web-based serving of information; convener of teams for mitigation planning efforts, to gather data and encourage collaboration post-disruption, etc.

**Measuring Resilience**

The region should measure its resilience through various standardized resilience measures, including the degree of regional income equality (i.e., how evenly income is distributed across a regional population) and the degree of regional economic diversification (i.e., degree to which economic activity is spread across sectors). As needed, the region should obtain and regularly update resiliency data with which to benchmark the region against national averages.

In our region, there is a relatively homogenous distribution of income, relative to other regions. However, because of the generally lower-than-state-and-national-average per capita incomes and relatively higher-than-state-and-national poverty rates, it can be said that the region is perhaps less resilient than its income distribution would suggest.

In our region, there has been a somewhat disturbing reduction in economic diversification, as manufacturing jobs are being replaced by service and commercial jobs, which often are lower wage, and which often do not provide benefits. Both the decreasing diversification rates and economic restructuring imply that the region might be less resilient than would be desirable.

**Summary**

1. **Region’s key vulnerabilities**
   
   A. Natural disasters, especially flood and winter storm events and their direct impacts to businesses and indirect impacts to businesses via their direct impacts on infrastructure and community institutions

   B. Economic disruptions, especially the exit or downsizing of major employers and non-local ownership of some major employers, inadequate workforce skills, need for businesses to become more productive and adopt new technologies, low innovation rates, and low levels of entrepreneurship

2. **Region’s resilience-building goal**

   A. Improve economic resilience through appropriate steady-state actions (avoidance, prevention, and mitigation of economic disruptions) and response actions (response to economic disruptions)

3. **Region’s resilience-building objectives**

   A. Avoid disruptions (plant closures, plant downsizings, production hiatuses, etc.)

   B. Reduce severity and duration of disruptions post-incident (plant closures, plant downsizings, production hiatuses, etc.)

4. **Region’s resilience-building strategies**

   A. Create county-level networks, that integrate emergency management personnel, economic development personnel, and other key stakeholders, to actively and regularly communicate and collaborate regarding proactive mitigation and post-disruption response

   B. Undertake appropriate infrastructure capital investment projects to mitigate potential disruptions due to natural disasters
C. Diversify economy
D. Upgrade labor force skills and job transferability
E. Promote innovation, adoption of new technologies and productivity enhancement, and entrepreneurship
F. Target development of emerging clusters
G. Establish formalized mechanisms to realign and retrain local workforces post-disruption
This following is the Vision for the future of the Southern Tier West region:

The Southern Tier West region will become a region whose economy is globally competitive, is dynamic and growing, and provides meaningful and sustaining employment for its residents. The Southern Tier West region will transform its regional economy into a regional-net-export-surplus, knowledge-based, innovation-based economy that is more internally self-sufficient, i.e., that is less dependent upon the extra-regional economy. The Southern Tier West region will maintain and cultivate the value-added regional-net-export-surplus sectors of the regional economy – be they manufacturing, service, or agricultural – in industry clusters and occupation clusters in which our region enjoys a competitive or niche advantage, in which there is opportunity and capacity for innovation, and in which there is significant growth potential.

To achieve this Vision, the region should attempt to achieve the following five economic development goals:

1. **Human Capital** – to develop a skilled labor force capable of creating a knowledge-based and innovation-based economy, and that encourages businesses to start, locate, and expand in the region

2. **Traditional and Non-Traditional Infrastructure** – to maintain and improve the region’s built environment and services that are requisite for retaining and expanding existing businesses and attracting new businesses

3. **Innovation and Entrepreneurship** – to catalyze innovation and new business development and growth, especially as regards technology-based, value added, and net export businesses

4. **Quality, Connected Places** – to create quality, connected, safe, convenient and healthy places to live and work, that make the region attractive as a place to live, work and do business

5. **Collaborative Leadership** – to encourage coordinated governance and rational and coordinated systemic investment in targeted economic development initiatives

The strategic recommendations (i.e., objective, priority strategic foci, projects, programs, and other activities) contained in this CEDS are consistent with and designed to achieve these five stated goals.

Objectives are more specific than goals, clearly measurable, and provide milestone parameters against which the region’s progress in attaining its economic goals can be evaluated. The following are the region’s fifteen economic development objectives:

1. Achieve per capita income levels exceeding state and national levels.
2. Achieve poverty rate levels less than state and national levels.
3. Achieve and sustain income transfer payment rates that are less than state and national levels.
4. Achieve unemployment rates less than state and national levels.
5. Reduce the level of underemployment and part time employment to levels that are less than state and national levels.
6. Reduce population outmigration to levels less than state levels and stabilize and augment regional population levels.
7. Increase the percentage of the region’s population that is represented by the 18-to-64 age demographic to levels exceeding state and national levels.
8. Achieve and sustain secondary and post-secondary (associates, bachelors, and graduate) education levels in excess of state and national levels.
9. Increase the average high-tech employment share to levels equal to or exceeding state and national averages.
10. Increase the technology-based knowledge occupations as a share of total employment to levels equal to or exceeding state and national averages.

11. Increase the utilization of venture capital investment in the region to state levels.

12. Increase broadband density and penetration levels to levels equal to or exceeding state and national averages.

13. Increase establishment churn rates to a level that exceeds state and national rates as a means to diversification as insurance against closures and dislocations of large employers.

14. Increase gross domestic product (GDP) per worker in the region to levels equal to or exceeding state and national averages.

15. Avoid disruptions (plant closures, plant downsizings, production hiatuses, etc.) and reduce severity and duration of disruptions post-incident.

The CEDS SWOT Analysis suggests the certain strategic regional economic development foci. The following are the region’s priority strategic foci in each of the above five economic development goal areas:

1. Target economic development activities and initiatives toward significant regional industry clusters and occupation clusters that are value-added and net export clusters

2. Promote and catalyze entrepreneurship

3. Increase the quantity and quality of human capital through education and job training, to develop a highly skilled, tech-savvy regional labor force

4. Augment our region’s educational services to encourage improved STEAM skills (Science, Technology, Engineering, Arts, and Mathematics skills) and entrepreneurial skills

5. Maintain and improve transportation infrastructure, consistent with smart growth principles

6. Maintain and improve utility infrastructure, including broadband and energy infrastructure, consistent with smart growth principles and with green infrastructure principles

7. Develop, improve, and expand industrial sites, acreage, parks, and buildings (“shovel readiness”), consistent with smart growth principles

8. Improve communities through initiatives including downtown revitalization and building renovation/redevelopment; development of more sustainable neighborhoods and walkable communities; brownfield remediation and redevelopment; protection and restoration of water resources, waterfronts, open spaces, and habitats; enhancement of public access to waterfront areas; and enhancement of recreational/tourism assets

9. Incentivize and catalyze innovation, technology transfer, and adoption of new technologies

10. Provide adequate and innovative development finance resources and technical assistance as needed to catalyze and incentivize (new and existing) private sector business development

11. Assist in the retention and expansion of existing regional businesses

12. Attract new businesses to the region

13. Maintain and improve the region’s cornerstone and community-based and civic institutions and quality of life assets, capacities, and services to improve area quality of life

14. Encourage, at the community, county, and regional levels, comprehensive and strategic economic development planning; and develop and implement community and economic development projects consistent with those plans and with smart growth principles and sound environment principles

15. Improve quality of life assets that impact economic development
16. Improve collaborative leadership, including increased strategic comprehensive planning and economic development planning and project implementation; enhanced levels of partnership and collaboration; increased investment in business development / business assistance capacity, entrepreneurial development, and innovation; and innovation with respect to government operating practices

17. Capture the potential of the Seneca Nation of Indians as a driver of economic development

18. Improve economic resilience in response to natural disasters and other (non-natural) disasters

Strategies are more specific types of activities and initiatives that the region endorses as a means to achieve the objectives identifies above, so as to attain its economic goals. This CEDS sets forth the following thirty-two primary economic development strategies, categorized under the five primary regional economic development goal areas presented above. Each group of strategies is prefaced by a restatement of the specific goal.

Human Capital – to develop a skilled labor force capable of creating a knowledge-based and innovation-based economy, and that encourages businesses to start, locate, and expand in the region

1. Retain and stabilize the regional population to provide a sufficient population base to ensure the continuing viability of regional institutions and communities, and to provide sufficient labor force to ensure that the region’s economy can grow and develop. By and large, this is a function of economic opportunity, infrastructure (broadband, utility and transportation improvements), business climate, cost of living, and quality of life.

2. Improve regional population demographics, i.e., attract a skilled, younger demographic population, to stabilize and grow the region’s population and labor force, and to reduce the impact of the region’s dependent population demographic.

3. Improve regional educational attainment through enhancing our region’s educational system and services; increasing the percentage of the population acquiring advanced educational degrees at the associate, bachelors, masters and doctoral levels; encouraging the region’s best and brightest to stay in the region to pursue their careers and lives; encouraging enhanced STEAM (Science, Technology, Engineering, Arts, and Mathematics) education, leadership, technology-based education, and entrepreneurial education at the primary, secondary, post-secondary, and adult education levels; and encouraging enhanced career development planning early on during education to help guide the younger demographic into careers with futures.

4. Increase the quantity and quality of human capital through education, workforce training, job training, internships, and other mechanisms so as to develop a highly skilled, tech-savvy regional labor force that meets current and future employer needs

5. Focus on building and capitalizing on regionally significant occupational clusters as a development asset.

Traditional and Non-Traditional Infrastructure – to maintain and improve the region’s built environment and services that are requisite for retaining and expanding existing businesses and attracting new businesses

6. Maintain and improve transportation infrastructure, consistent with smart growth principles and sustainability principles, and utilize the region’s transportation infrastructure as a driver of economic development

7. Maintain and improve utility infrastructure, including water and wastewater service, natural gas and electricity service, and broadband and alternative energy infrastructure; whenever possible, such investments should be consistent with smart growth principles, sustainability principles, and green infrastructure principles

8. Improve the region’s “shovel readiness” through activities including site development / industrial park and acreage expansion / infrastructure expansion / permitting / development along rail and highway
corridors and broadband backbone corridor / interstate interchange development / spec building development / building redevelopment, all consistent with smart growth principles

9. **Develop, improve, and expand non-physical or non-traditional infrastructure**, including specialized space, dedicated equipment, information and communication technologies, business networks, linkages to the education/research/labor force training system, and logistics; and also including the development of physical facilities geared toward technology-based businesses, including specialized shared-use physical facilities, especially as regards technology development (i.e., prototype development, shared testing and manufacturing equipment, test beds, etc.), shortage of diverse and affordable physical space with specialized amenities (e.g., broadband, shared conference space, shared operating and office equipment, etc.)

10. **Improve communities** through initiatives including downtown and neighborhood revitalization and redevelopment; building renovation / adaptive redevelopment / re-purposing and reuse; encouragement of improved sustainability of communities and neighborhoods, complete streets, and walkable communities; brownfield remediation and redevelopment; protection and restoration of water resources, waterfronts, open spaces, and habitats; enhancement of public access to waterfront areas; increasing and improvement of housing stock and building stock; creation and improvement of creative districts and neighborhoods; improvement of wayfinding; and enhancement of recreational / tourism assets (including public parks space, green space, trails, etc.)

**Innovation and Entrepreneurship** – *to catalyze innovation and new business development and growth, especially as regards technology-based, value added, and net export businesses*

11. Target economic development activities and initiatives toward significant regional industry clusters and occupation clusters that are value-added and net export clusters

12. **Promote and catalyze** entrepreneurship

13. Incentivize and catalyze enhanced business productivity, innovation, technology transfer, technology adoption and commercialization, and collaboration/partnerships between the university, business, and economic development communities

14. Provide adequate and innovative business development finance resources, technical assistance, and outreach as needed to catalyze and incentivize new private sector business development and assist in the retention and expansion of existing regional businesses

15. **Assist in the retention and expansion of existing regional businesses**

16. **Attract new businesses to the region**

**Quality, Connected Places** – *to create quality, connected, safe, convenient and healthy places to live and work, that make the region attractive as a place to live, work and do business*

17. Maintain and improve the region’s cornerstone and community-based and civic institutions and quality of life assets, capacities, and services to improve area quality of life and positively impact economic development

18. **Develop, maintain and promote a range of housing choices and opportunities for all residents; efficient public transportation systems; safe pedestrian networks; access to quality health care and educational facilities; and other quality of life amenities**

19. **Utilize smart growth principles to insure cost effective growth and development while minimizing sprawl**

20. **Promote the region’s diversity**

21. **Enhance and promote the region’s cultural, arts, history, and tourism assets, destinations, organizations, and services**
22. Develop, maintain and promote integrated connections between communities both across the region and external to the region.

23. Promote and protect the region’s natural resources in a sustainable manner.

24. Streamline and reform permitting, development review, and other regulatory processes to provide a predictable legal and regulatory environment for businesses.

25. Ensure regional and local agencies provide collaborative, seamless, consistent and timely customer service to business.

26. Develop a business-friendly regulatory and tax system and business assistance/incentive programs.

27. Enhance regional marketing capacity and activities.

**Collaborative Leadership – to encourage coordinated governance and rational and coordinated systemic investment in targeted economic development initiatives.**

28. Encourage, at the community, county, and regional levels, comprehensive and strategic economic development planning; develop and implement community and economic development projects consistent with those plans and with smart growth principles and sound environment principles; and create capital funds to implement projects.

29. Improve coordination and collaboration between and among all levels of government as well as the private sector, including enhancing public-private partnerships, and make strategic investments that are aligned with and further regional priorities.

30. Improve leadership training and enhance public involvement in coordinating decision-making and investments at the regional level.

31. Seneca Nation of Indians initiatives.

32. Improve economic resilience through appropriate steady-state actions (avoidance, prevention, and mitigation of economic disruptions) and response actions (response to economic disruptions).
Action Plan

The CEDS action plan answers the question “How do we get there?” The CEDS action plan is a portfolio of potential initiatives and projects – consistent with the above goals, objectives, and strategies – that herein are identified formally as being primary actions for achieving the region’s goals.

The action plan identifies – for each of the thirty-two strategies identified above – a list of representative potential initiatives and/or projects, the primary stakeholder(s) responsible for the implementation of the initiatives/projects, a timetable for the implementation of initiatives/projects, and the opportunities for the integrated use of other local, state, and federal funds.

The order of presentation of the individual strategies in each of the five goal areas matches the order of presentation of goals, objectives, and strategies (see above). However, the thirty-two strategies, and the individual initiatives for each of the thirty-two strategies, are not prioritized or ranked in any order.

**Human Capital** – to develop a skilled labor force capable of creating a knowledge-based and innovation-based economy, and that encourages businesses to start, locate, and expand in the region

1. **Retain and stabilize the regional population** to provide a sufficient population base to ensure the continuing viability of regional institutions and communities, and to provide sufficient labor force to ensure that the region’s economy can grow and develop. By and large, this is a function of economic opportunity, infrastructure (broadband, utility and transportation improvements), business climate, cost of living, and quality of life.

   Responsibility: County planning departments and economic development organizations, educational institutions at all levels, training providers, WIB’s, Southern Tier West RPDB
   Timetable: Ongoing
   Funding: Various local, state, and federal funds; foundation funds

   Examples of potential initiatives/projects:
   - Regional marketing activities
   - Recruitment of college graduates by local firms
   - Career pipeline programs, including internships, mentoring, etc.
   - Entrepreneurial development programs
   - Displaced worker retraining and job placement programs
   - Infrastructure improvement initiatives
   - Home ownership programs

2. **Improve regional population demographics**, i.e., attract a skilled, younger demographic population, to stabilize and grow the region’s population and labor force, and to reduce the impact of the region’s dependent population demographic.

   Responsibility: County planning departments and economic development organizations, educational institutions at all levels, training providers, WIB’s, Southern Tier West RPDB
   Timetable: Ongoing
   Funding: Various local, state, and federal funds; foundation funds

   Examples of potential initiatives/projects:
   - Regional marketing activities
   - Recruitment of college graduates by local firms
   - Career pipeline programs, including internships, mentoring, etc.
• Entrepreneurial development programs
• Research and survey what young people want in their ideal community (e.g., cultural attractions, etc.), and work to develop communities consistent with these findings to make them more attractive to a younger demographic
• Develop more scholarship programs

3. **Improve regional educational attainment** through enhancing our region’s educational system and services; increasing the percentage of the population acquiring advanced educational degrees at the associate, bachelors, masters and doctoral levels; encouraging the region’s best and brightest to stay in the region to pursue their careers and lives; encouraging enhanced STEAM (Science, Technology, Engineering, Arts, and Mathematics) education, leadership, technology-based education, and entrepreneurial education at the primary, secondary, post-secondary, and adult education levels; and encouraging enhanced career development planning early on during education to help guide the younger demographic into careers with futures.

   Responsibility: Educational institutions at all levels, training providers, WIB’s, county planning departments and economic development organizations, Southern Tier West RPDB
   Timetable: Ongoing
   Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:
• Encouragement of advanced educational attainment
• Encouragement of vocational education
• Improvements in educational offerings, especially in STEAM, entrepreneurship, and technology
• Leadership training
• Implementation of educational programs that encourage creativity and problem solving
• Promotion of cooperation between local educational institutions
• Investment in colleges and universities in the region, especially public sector institutions

4. **Increase the quantity and quality of human capital through education, workforce training, job training, internships, and other mechanisms**, to develop a highly skilled, tech-savvy regional labor force that meets current and future employer needs.

   Responsibility: Educational institutions at all levels, training providers, WIB’s, county planning departments and economic development organizations, business community, Southern Tier West RPDB
   Timetable: Ongoing
   Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:
• Encouragement of workforce productivity enhancement programs, including:
  o Increased implementation of general and specialized labor force and workforce development and training programs, including skills upgrading, basic training, and literacy programs
  o Reduction of workplace substance abuse
  o Increased availability of affordable child, elder, and dependent day care
  o Increased availability of health insurance and wellness programs to improve workforce health and productivity
• Career talent pipeline initiatives, apprenticeships, pre-apprenticeships, internships, “soft skills” education,
and other job preparation programs, including, for example, career talent pipeline initiatives in strategic industry sectors such as Dream It Do It for the manufacturing industry and iSciWNY for the health care industry

- Encouragement of vocational and non-vocational education and training related to current and future employer-specific and cluster-specific needs, including utilization of the New York State Next Generation Job Linkage Program, encouragement of transferable skills training, and encouragement of training with respect to employment-related use of technology

- Engage business and industry representatives within individual school districts to work with teachers at schools and BOCES (Board of Cooperative Educational Services) in their districts to add rigor and practicality to STEAM (science, technology, engineering, arts, and mathematics) programs

- Establish a sourcing portal for assessment, career planning, job listings, and training opportunities to augment capacities of existing one-stop centers

5. **Focus on building and capitalizing on regionally significant occupational clusters as a development asset.**

   Responsibility: Educational institutions at all levels, training providers, WIB’s, county planning departments and economic development organizations, business community, Southern Tier West RPDB

   Timetable: Ongoing

   Funding: Various local, state, and federal funds; foundation funds

   Examples of potential initiatives/projects:

   - Build occupational clusters by encouraging education and transferable skills training related to current and future employer-specific and cluster-specific needs
   - General and specialized labor force and workforce training projects
   - Build occupational clusters by development of networks between companies and workers in clusters
   - Incentivizing occupational cluster development through enhancing benefits of employment in clusters, e.g., insurance, retirement, investment opportunities, purchasing clubs, etc.

6. **Maintain and improve transportation infrastructure**, consistent with smart growth principles and sustainability principles, and utilize the region’s transportation infrastructure as a driver of economic development.

   Responsibility: NYS DOT, county governments (including county DPW), local governments (including local DPW), social services agencies, Southern Tier West RPDB

   Timetable: Ongoing

   Funding: Various local, state, and federal funds

   Examples of potential initiatives/projects:

   - Improvement and development of interstate highways I-86 and I-90 as regional economic development corridors
   - Continued construction of I-219 (Interstate Route 219), a primary north-south limited access highway corridor bisecting the region, as part of a multi-state development corridor. Initial pre-construction phase to include Supplemental Environmental Impact Statement (EIS) Study Project.
   - Additional investment in other highway trade corridors, including NYS Routes 16, 19, 60, and 62 and other local and State highways and bridges, including complete streets/walkable community projects
   - Additional investment in railroad infrastructure, including maintenance of and improvements to the...
existing railroad system to maximum practical FRA standards for freight handling capacity, construction
that removes clearance obstructions and/or weight limitations, phased construction of freight transfer
transload facility in region, and construction of rail sidings and assistance to businesses to develop rail
freight shipping capacity
• Additional investment in aviation infrastructure and service
• Additional investment in mobility management infrastructure and service (public transportation)
• Coordination of mobility management services with employers, social services agencies, and health care
providers
• Continuously update the Regional Strategic Transportation Plan
• Work toward development of an RPO for the region
• Continuously develop a current priority transportation investment schedule for the region’s
transportation infrastructure that considers economic development issues
• Specific topical transportation planning activities

7. **Maintain and improve utility infrastructure, including water and wastewater service, natural gas and
electricity service, and broadband and alternative energy infrastructure; whenever possible, such
investments should be consistent with smart growth principles, sustainability principles, and green
infrastructure principles.**

Responsibility: Local governments (utility and energy infrastructure); county governments and
Southern Tier West RPDB (broadband); county economic development organizations:
various including local and county governments and private sector (energy
improvements and energy projects)

Timetable: Ongoing
Funding: Various local, state, and federal funds

Examples of potential initiatives/projects:

• Municipal water and wastewater systems, access roads, and local roads and bridges

• Publicly-owned and privately owned municipal energy system projects, including alternative energy
projects and the creation of a regional energy purchasing alliance

• Implementation of strategic projects identified in the comprehensive smart growth plan for regional
sustainability developed through the five-county Western New York Region “Cleaner, Greener
Communities Regional Sustainability Planning Program,” funded through NYSERDA.

• Regional broadband and communications infrastructure initiatives

• Identification and GIS-based inventoring of existing and planned infrastructure

• Investigation of incorporation of fuel cell technologies at municipal wastewater treatment plant, to
produce three value streams (electricity, hydrogen and heat)

• Enhancement of the region’s infrastructure development finance capacity, including the creation and
utilization of innovative infrastructure funding tools and partnerships

• Utilization of funding assistance from the Southern Tier West Development Foundation to promote
infrastructure planning and preliminary engineering

• Technical assistance from County Departments of Planning and Development, County Health
Departments, and County Industrial Development Agencies to promote infrastructure planning and
preliminary engineering
8. **Improve the region’s “shovel readiness”** through activities including site development / industrial park and acreage expansion / infrastructure expansion / permitting / development along rail and highway corridors and broadband backbone corridor / interstate interchange development / spec building development / building redevelopment, all consistent with smart growth principles.

Responsibility: County economic development organizations, local governments, Southern Tier West RPDB

Timetable: Ongoing

Funding: Various local, state, and federal funds

Examples of potential initiatives/projects:

- Site development, especially along rail and highway corridors and the broadband backbone corridor, or at site locations identified in broadband study, or in or adjacent to industrial parks or other industrial land uses or compatible land uses

- Expansion of existing industrial and business parks and construction of new industrial and business parks, consistent with smart growth principles

- Infrastructure expansion, to permit or catalyze business location or expansion, especially within or adjacent to industrial parks or other industrial land uses or compatible land uses, but consistent with smart growth principles

- Permitting assistance initiatives

- Interstate interchange development, including shovel readiness initiatives at perspective business location sites, including:
  - I-86 Exit 6 (Sherman, Chautauqua County)
  - I-86 Exit 13 (Falconer, Chautauqua County)
  - I-86 Exit 17 (Steamburg, Cattaraugus County)
  - I-86 Exit 23 (Limestone, Cattaraugus County)
  - I-86 Exit 24 ( Allegany, Cattaraugus County)
  - I-86 Exit 27 (Hinsdale, Cattaraugus County)
  - I-86 Exit 28 (Cuba, Allegany County)
  - I-86 Exit 29 (Friendship, Allegany County)
  - I-86 Exit 30 (Amity, Allegany County)
  - I-90 Exit 61 (Ripley, Chautauqua County)
  - I-90 Exit 60 (Westfield, Chautauqua County)
  - I-90 Exit 59 (Dunkirk, Chautauqua County)
  - I-90 Exit 58 (Irving, Chautauqua County)

- Construction of speculative / non-speculative industrial, logistics, and office buildings and multi-tenant facilities

- Adaptive building renovation, rehabilitation, redevelopment and reuse projects, converting older buildings into modern productive facilities, especially in downtowns or in business districts

- Remediation of brownfield acreage and buildings and redevelopment of these assets into productive uses

- Marketing of these assets to prospective businesses that might locate in the region

9. **Develop, improve, and expand non-physical or non-traditional infrastructure**, including specialized space, dedicated equipment, information and communication technologies, business networks, linkages to the education/research/labor force training system, and logistics; and also including the development of physical facilities geared toward technology-based businesses, including specialized shared-use physical facilities, especially as regards technology development (i.e., prototype development, shared testing and manufacturing equipment, test beds, etc.), shortage of diverse and affordable physical space with specialized amenities (e.g., broadband, shared conference space, shared operating and office equipment, etc.).
Responsibility: County economic development organizations, educational institutions, incubators, business community, cluster network groups, broadband service providers, local governments, WIB’s, Southern Tier West RPDB

Timetable: Ongoing
Funding: Various local, state, and federal funds

Examples of potential initiatives/projects:

- Incubator initiatives
- Specialized facility development initiatives
- Specialized equipment initiatives
- Business network development
- Technology commercialization initiatives, including prototype development, shared testing and manufacturing equipment, test beds, etc.

10. **Improve communities** through initiatives including downtown and neighborhood revitalization and redevelopment; building renovation / adaptive redevelopment / re-purposing and reuse; encouragement of improved sustainability of communities and neighborhoods, complete streets, and walkable communities; brownfield remediation and redevelopment; protection and restoration of water resources, waterfronts, open spaces, and habitats; enhancement of public access to waterfront areas; increasing and improvement of housing stock and building stock; creation and improvement of creative districts and neighborhoods; improvement of wayfinding; and enhancement of recreational / tourism assets (including public parks space, green space, trails, etc.).

Responsibility: County economic development organizations, county DPW’s, local governments, local/community development and housing organizations, Southern Tier West RPDB, NYS DEC

Timetable: Ongoing
Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:

- Downtown and neighborhood revitalization and redevelopment initiatives, consistent with smart growth principles
- Building renovation / adaptive redevelopment / re-purposing and reuse, consistent with smart growth principles
- Encouragement of improved sustainability of communities and neighborhoods, complete streets, and walkable communities
- Brownfield remediation and redevelopment initiatives
- Protection and restoration of water resources, waterfronts, open spaces, and habitats
- Enhancement of public access to waterfront areas (including riverfronts and lakefronts)
- Increasing / improving housing stock and building stock
- Creation and improvement of creative districts and neighborhoods
- Improvement of wayfinding; and enhancement of natural and man-made recreational / tourism assets (including public parks space, green space, greenway/blueway/other trails, facilities, attractions, etc.)
**Innovation and Entrepreneurship** – to catalyze innovation and new business development and growth, especially as regards technology-based, value added, and net export businesses

### 11. Target economic development activities and initiatives toward significant regional industry clusters and occupation clusters that are value-added and net export clusters.

**Responsibility:** County economic development organizations, Southern Tier West RPDB  
**Timetable:** Ongoing  
**Funding:** Various local, state, and federal funds; foundation funds; private sector funds

Examples of potential initiatives/projects:

- Engagement in cluster-specific strategies, i.e., specific initiatives targeting the following clusters: machinery manufacturing, fabricated metal product manufacturing, glass/ceramics/advanced materials, agribusiness/food processing/technology, forest and wood products, and tourism; additional focus should be given to technology-based businesses and value-added export service sectors, including personal service occupations and medical occupations
  - Ceramics, glass, and advanced materials cluster, through technology transfer from research institutions to the business and entrepreneurial communities in the cluster, and through assistance in realizing opportunities by businesses in this cluster, and through startup of new cluster businesses
  - Agribusiness, food processing and technology cluster, especially in primary production and secondary processing, through assistance in realizing opportunities by businesses in this cluster, through adoption of new technologies by businesses in this cluster, and through startup of new cluster businesses
  - Forest and wood products cluster, through promotion of increased secondary processing (e.g., dimensioning, furniture manufacturing, etc.) activities, and through assistance in realizing opportunities by businesses in this cluster, and through startup of new cluster businesses

- Other cluster-specific initiatives could include:
  - Information technology and telecommunications cluster, through increased utilization of broadband infrastructure, e.g., attraction of back offices, call centers, regional data storage, increased web marketing presence, etc., through assistance in realizing opportunities by businesses in this cluster, and through startup of new cluster businesses
  - Arts, entertainment, recreation and visitor industries cluster, through enhanced development of recreational and tourism destination facilities and cultural assets and services, creation of year-round tourism at destinations that currently are seasonal destinations, increased integration of heritage and cultural tourism with non-heritage/cultural tourism to increase the number and duration of visitor stays, and enhanced centralization and coordination of tourism and recreational marketing and promotion and event scheduling
  - Biomedical/biotechnical (life sciences) cluster through developing increased linkages to the economic development and technology initiatives being undertaken in Erie County in this cluster, through targeted assistance to realizing opportunities by businesses in this cluster, and through startup of new cluster businesses
  - Transportation and logistics cluster, through enhanced access to transportation infrastructure and services, through development of sites and building attuned to cluster business needs, through marketing of locations within the region to cluster businesses, and through targeted incentives and other assistance to existing and prospective cluster businesses
  - Computer and electronic products, through targeted assistance to realizing opportunities by businesses in this cluster, and through startup of new cluster businesses
  - Green and alternative energy business cluster through targeted assistance to development and incorporation of new technologies and startup of new businesses
• Capitalize on occupational clusters by targeting development of companies and entrepreneurship within the target occupational clusters

• Networking initiatives

• Needs/opportunities assessment initiatives: In-person contact and surveys of businesses and other entities (e.g., universities, trade associations, etc.) within the target clusters to determine their needs and their suggestions for initiatives and assistance that would catalyze business development within the target clusters

• Targeted education / skills training initiatives: Identification of the labor force needs of businesses in selected target clusters, and the encouragement of targeted secondary and post-secondary education college educational offerings and skills training programs to meet these needs

• Targeted marketing initiatives that market opportunities in the region to businesses in the target clusters, and encouragement of the location of operations within the region

• Targeted business assistance initiatives directed toward significant regional industry clusters and occupation clusters

• Encouragement of entrepreneurship in the target clusters

• Encouragement of cross-contact between businesses in the target clusters, and between the business community and university research community, with the goal of enabling businesses in the target clusters to discover and realize potential opportunities that may be present

12. Promote and catalyze entrepreneurship.

Responsibility: County planning departments and economic development organizations, educational institutions at all levels, local/community development organizations, business community, Southern Tier West RPDB

Timetable: Ongoing

Funding: Various local, state, and federal funds; foundation funds; private sector funds

Examples of potential initiatives/projects:

• Enhanced entrepreneurship education (“creating a pipeline of entrepreneurs”), through:
  o Inclusion of entrepreneurship concepts in K-12 in-school curricula, preferably using experiential learning techniques
  o Development and expansion of programs encouraging student-created and student-run after-school entrepreneurship programs
  o Integration of entrepreneurship into a wide range of courses and disciplines at post-secondary education institutions
  o Development of business plan competitions and other innovative methods of encouraging entrepreneurship

• “Widening the entrepreneurial pipeline” through innovative programs such as:
  o Adult entrepreneurship training and technical assistance, including basic business planning, marketing assistance,
  o Enhanced assistance to prospective entrepreneurs and startups, including business planning and counseling assistance, marketing assistance, financial education, product development and marketing assistance, utilization of web-based business infrastructure and services, export assistance, technology assistance, and other types of technical and management assistance
  o Innovative financial assistance such as enhanced venture capital availability and enhanced debt and equity assistance, etc.
Improved access to capital by entrepreneurs and businesses, through:

- Provision of training and assistance to entrepreneurs and businesses seeking debt and equity capital infusions to help them create better funding assistance applications
- Capitalization and utilization of public sector and non-profit revolving loan funds and venture capital funds to meet capital demand, especially with respect to (a) start-up and early stage business situations in which subordinate collateral asset lending positions are needed to leverage senior collateral asset position private sector debt and equity capital into project funding structures, and (b) the specific needs of entrepreneurs at different levels of development
- Encouragement of the increased use of public sector guarantee programs (SBA 7A, USDA RD B&I, etc.) to encourage commercial lenders to provide debt financing to start-ups
- Development and utilization of non-traditional public business financing sources (e.g., public sector equity/venture capital fund, etc.), including the Western and Central New York’s Region Entrepreneurship Action Plan (REAP) program and the New York State Innovation Venture Capital Fund
- Encouragement of the increased use of and improved access to private sector angel and venture capital small business financing

Entrepreneurial community and cluster networking to promote access to networks and entrepreneurial culture, through:

- Creation of networks, mentoring, and ambassadors programs that allow entrepreneurs to share ideas, learn from one another, and conduct business together, linking them to new markets, new sources of capital, new employees, strategic alliance partners, and service providers
- Encouragement of increased cultural, social, and civic engagement that will encourage, nurture, and raise the profile of entrepreneurs, helping them achieve success and encouraging others to become entrepreneurs
- Networking and collaboration initiatives
  - Entrepreneurial mentoring and entrepreneurial internship programs, such as Business Mentor NY
  - Undertaking a regional business plan competition
  - Celebration of entrepreneurship
    - Business incubator initiatives, and incubator business development initiatives, including utilization of the New York State Business Incubator and Innovation Hot Spots Program
    - Increased collaboration and links between the university, business, and economic development communities, especially as regards industry cluster building
    - Market entrepreneurial opportunities to college graduates and those who previously had out-migrated from the region
    - Promotion of the utilization of START-UP NY Program
    - The creation and utilization of non-traditional ownership mechanisms and business ownership formats (e.g., publicly owned, quasi-public-owned, private-non-profit-owned, joint venturing and partnering mechanisms, ESOPS, and umbrella business start-up corporations) to start-up/spin-off program to catalyze new business creation
    - Encouragement of broadband-based business development, especially at locations along the fiber trunk line
13. Incentivize and catalyze enhanced business productivity, innovation, technology transfer, technology adoption and commercialization, and collaboration/partnerships between the university, business, and economic development communities.

Responsibility: Business community, county economic development organizations, municipal development departments, educational institutions, local/community development organizations, State and federal business development agencies, Southern Tier West RPDB

Timetable: Ongoing

Funding: Various local, state, and federal funds; foundation funds; private sector funds

Examples of potential initiatives/projects:

- Analysis of the productivity and technology utilization of individual businesses to develop business-specific assistance
- Education of individual businesses regarding the technologies, improvements, and productivity enhancements that might be appropriate for and available to them
- Provision to individual businesses of the specific financial, technical, and training assistance that is necessary to encourage and enable them to adopt new technologies and other productivity-enhancing improvements, including:
  - Replacement, upgrading, and updating of obsolete and inefficient physical plants, machinery, and equipment
  - Increased utilization in business operations of computerization, robotics, telecommunications infrastructure, internet, etc.
- Encouragement of increased levels of technology transfer at both the supply side (e.g., at both regional technology research institutions and extra-regional technology research institutions) and the demand side (i.e., in the business and entrepreneurial communities)
- Technology commercialization initiatives
- University-business collaboration and partnership initiatives
- Technical consulting initiatives
- Internship placement activities
- Mentoring activities
- Promotion of increased utilization of by-products, resulting in (a) cash flow generating economic activity and (b) reduction of waste produced, waste handling costs, and waste disposal costs

14. Provide adequate and innovative business development finance resources, technical assistance, and outreach as needed to catalyze and incentivize new private sector business development and assist in the retention and expansion of existing regional businesses.

Responsibility: County governments and economic development organizations, educational institutions, local/community development organizations, business community, State and federal business development agencies, Southern Tier West RPDB

Timetable: Ongoing

Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:

- Projects to capitalize and encourage appropriate use – as development tools – of specialized business development zones, industrial development agencies, and innovative debt and equity incentive financing programs including industrial incentive financing, industrial revenue bonds, revolving loan funds, venture
capital financing, public sector or community-based equity capital (including the Western and Central New York's Region Entrepreneurship Action Plan (REAP) program and the New York State Innovation Venture Capital Fund) and micro-capital funds (especially seed or first stage capital funds), etc.

- Use of pension and community endowment funds to invest in local job creation strategies and to provide community venture capital for nonprofits, entrepreneurs, and employee-owned firms.

- Technical assistance to business, entrepreneurs, and prospective entrepreneurs, including business planning, counseling and crisis assistance, procurement, export, marketing, productivity enhancement, new technology, engineering, human resource development, vending, procurement, operational, environmental / other compliance, and other technical and financial assistance, etc.

- Development and utilization of a standardized team-based client/prospect management system to be used by economic development and human resource organizations, to include:
  - An integrated internet-based site/building database, including database management protocols, and a lead agency system for client/prospect management
  - Provision of consistent information and contact information at municipal and county offices
  - An integrated internet-based economic development program database
  - Training of system users to improve networking amongst economic development and human resource organizations, to increase understanding of each other’s capabilities and missions, to improve referral performance, and to reduce response times and costs experienced by target clients/prospects

- Provision of training and assistance to businesses and entrepreneurs seeking debt and equity capital infusions to help them create better applications

- Streamlining access to existing public revolving loan funds

- Increased private sector access to private sector financing, through:
  - Encouragement of commercial banks to offer aggressive, development-oriented non-traditional lending practices to the specific selected target clusters
  - Increased utilization of public sector guarantee programs (SBA 7A, USDA RD B&I, etc.) to catalyze increased access to commercial bank loans
  - Encouragement of the increased use of and improved access to private sector angel and venture capital small business financing

- Workforce development and training initiatives

- Initiatives to encourage broadband-based business development, especially at locations along the fiber trunk line

- “Buy local” programs and other local vendor sourcing programs

15. **Assist in the retention and expansion of existing regional businesses.**

   Responsibility: County development departments and economic development organizations, local/community development organizations, State and federal business development agencies, Southern Tier West RPDB

   Timetable: Ongoing

   Funding: Various local, state, and federal funds; foundation funds

Example of potential initiatives/projects:

- Business visitation initiatives

- Economic resilience initiatives
• Technical and financial assistance initiatives providing assistance as needed by regional businesses
• Workforce development and training initiatives
• Regulatory assistance initiatives
• Business productivity assistance initiatives
• Mentoring initiatives
• Development of programs to assist businesses with utilizing their excess production capacity and labor force surpluses
• Promotion and development of multi-firm operating and/or marketing initiatives, and/or shared supplier networks
• Encouragement of government procurement and regional and international exports
• Encouragement of the maintenance of local ownership of manufacturing, value-added and export sector firms, and promotion of the return of non-locally owned manufacturing, value-added and export sector firms to local ownership
• Assistance with the takeover of a failing or otherwise exiting business by employees (e.g., an ESOP), and provision of assistance to employee-owned businesses

16. **Attract new businesses to the region.**

Responsibility: County development departments and economic development organizations, local/community development organizations, business community, State and federal business development agencies, Buffalo Niagara Enterprise, real estate community, Seneca Nation of Indians, Southern Tier West RPDB

Timetable: Ongoing

Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:

• Regional marketing initiatives, including:
  o Development and maintenance of databases of buildings and sites within the region, in conjunction with the private sector real estate brokerage community
  o Increased utilization of BNE and NYS ESD marketing programs
  o Increased direct marketing activities to business in target clusters
  o Increased utilization of site development publications and consultants
  o General direct extra-regional marketing activities involving marketing the entire region as a brand, at the three-county and five-county Western New York levels, focusing on our collective workforce talents, low (or at least competitive) cost of living, low (or at least competitive) cost housing, and rural quality of life

• Increased readiness for business development, including development of shovel-ready sites, construction of speculative buildings, renovation of redevelopable buildings, remediation of brownfield sites and buildings, enhancement of utility and other required services, etc.

• Regional business ambassador initiatives, through which successful local business persons would meet with businesses and entrepreneurs considering locating businesses within the region in order to provide a sense of the region is a realistic and positive choice for their business location

• Development and utilization of project teams that will respond to individual businesses interested in locating within the region
Innovative financial assistance initiatives

**Quality, Connected Places** – to create quality, connected, safe, convenient and healthy places to live and work, that make the region attractive as a place to live, work and do business.

17. **Maintain and improve the region’s cornerstone and community-based and civic institutions and quality of life assets**, capacities, and services to improve area quality of life and positively impact economic development.

- **Responsibility:** County planning and development departments, social service organizations, civic institutions, arts/cultural/history organizations, local governments, local/community organizations, non-profit sector, private sector/business community, Southern Tier West RPDB
- **Timetable:** Ongoing
- **Funding:** Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:

- Initiatives to support, stabilize and enhance community, civic, and social institutions and organizations
- Community facility, civic facility, civic places, recreational assets, and cultural assets construction, renovation, and improvement initiatives
- Initiatives to support, stabilize and enhance cultural (arts, historical, and entertainment) capacity, assets, institutions, services, and offerings
- Central business district improvement initiatives
- Public safety initiatives / initiatives to reduce crime
- Public health initiatives
- School and educational initiatives
- Broadband initiatives

18. **Develop, maintain and promote a range of housing choices and opportunities** for all residents; **efficient public transportation systems**, safe pedestrian networks; access to quality health care and educational facilities; and other quality of life amenities.

- **Responsibility:**
  - Housing: County planning departments, Community-Based Housing Organizations (Neighborhood Preservation Companies, Rural Preservation Companies, etc.), banks, developers and landlords, municipalities, Southern Tier West RPDB
  - Public transportation:
  - Pedestrian networks:
  - Health care: NYS DOH, county health departments, hospitals and health care providers, Southern Tier West RPDB
  - Educational facilities:
  - Other quality of life amenities:
- **Timetable:** Ongoing
- **Funding:** Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:

- Initiatives to improve **housing choices and opportunities** for all residents, including:
  - Home ownership and home improvement programs
  - Incentivization and encouragement of construction and rehabilitation of different types of housing
- Initiatives to improve the **efficiency of public transportation systems** for all residents, including:
o Additional investment in mobility management (public transportation) infrastructure and service
o Coordination of mobility management services with employers, social services agencies, and health care providers

- Initiatives to improve **access to quality health care** for all residents, including:
  o Patient center medical home / patient neighborhood initiatives, to build connections between primary care and specialty care, especially as regards mental health and substance abuse
  o Increased use of electronic health records
  o Recruitment of physicians, nurses, and specialized technical service providers
  o Urgent care in rural communities
  o Initiatives to stabilize financial hospitals in rural communities, including critical access hospital initiatives
  o Regionalization of health care through CIO (Clinical Integration Organization) or ACO (Accountable Care Organization) initiatives and sharing of resources (people and equipment)
  o Connecting community health care with public health and other community based organizations with similar goals to reduce the incidence of chronic disease, etc. (e.g., diabetes, group counseling, obesity, etc.)
  o Promotion by local providers of utilization and consumption of local foods by institutions and residents

- Initiatives to improve **safe pedestrian networks** for all residents, including:
  o Complete streets programs
  o Walkable communities programs
  o Urban and rural trail projects

- Initiatives to improve **access to quality educational facilities** for all residents, including:
  o Expansion of educational facilities at educational institutions
  o Development of innovative educational and training programs at educational institutions
  o Scholarship and financial assistance programs to incentivize educational enrollment and attainment, also including work study, internships, etc.

19. **Utilize smart growth principles** to insure cost effective growth and development while minimizing sprawl.

</table>
Funding: Various local, state, and federal funds

Examples of potential initiatives/projects:

- Enhanced engagement and enfranchisement of disenfranchised sectors, including but not limited to women and racial/ethnic/religious minorities
- Promotion of utilization of MWBE procurement and MWBE business development
- Training and entrepreneurial programs targeting disenfranchised sectors, including but not limited to women and racial/ethnic/religious minorities
- Leadership development programs targeting disenfranchised sectors, including but not limited to women and racial/ethnic/religious minorities
- Celebration of disenfranchised sectors and their cultures, including but not limited to women and racial/ethnic/religious minorities

21. **Enhance and promote the region’s cultural, arts, history, and tourism assets, destinations, organizations, and services.**

   Responsibility: Arts/cultural/history organizations, county planning and development departments, county DPW’s, tourism agencies, local governments, local/community organizations, non-profit sector, private sector/business community, Southern Tier West RPDB

   Timetable: Ongoing

   Funding: Various local, state, and federal funds; foundation funds

   Examples of potential initiatives/projects:

   - Financial, technical, and programmatic support initiatives for cultural, arts, history, and tourism assets, destinations, organizations, and services
   - Incentivization of the development and expansion of cultural, arts, history and tourism asset and destination facilities
   - Regional marketing and coordinated scheduling activities

22. **Develop, maintain and promote integrated connections between communities both across the region and external to the region.**

   Responsibility: Local governments, local/community organizations, county planning and development departments, Southern Tier West RPDB

   Timetable: Ongoing

   Funding: Various local, state, and federal funds; foundation funds

   Examples of potential initiatives/projects:

   - Shared services initiatives
   - Consolidation initiatives
   - Inter-community infrastructure services
   - Joint intermunicipal planning and development projects

23. **Promote and protect the region’s natural resources in a sustainable manner.**

   Responsibility: County planning and development departments, local governments, NYS DEC, business community, local community organizations, Southern Tier West RPDB

   Timetable: Ongoing

   Funding: Various local, state, and federal funds; foundation funds

   Examples of potential initiatives/projects:
• Environmental and habitat protection initiatives
• Water resource protection initiatives
• Implementation of strategic projects identified in the comprehensive smart growth plan for regional sustainability developed through the five-county Western New York Region “Cleaner, Greener Communities Regional Sustainability Planning Program,” funded through NYSERDA
• Promotion of increased environmentally sound utilization of the region’s natural resources, and improved business compliance with environmental regulations
• Encouragement and enhancement of renewable energy exploration and production in an environmentally sensitive manner
• Promotion of the region as a destination for outdoor recreation activities while preserving the natural rural environment (enhancement of access to nature and environmental preservation)

24. **Streamline and reform permitting, development review, and other regulatory processes to provide a predictable legal and regulatory environment for businesses.**

Responsibility: County departments, local governments, NYS DEC, business community, Southern Tier West RPDB
Timetable: Ongoing
Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:
• Permit and regulatory technical assistance initiatives

25. **Ensure regional and local agencies provide collaborative, seamless, consistent and timely customer service to business.**

Responsibility: County departments, local governments, NYS DEC, business community, Southern Tier West RPDB
Timetable: Ongoing
Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:
• Permit and regulatory technical assistance initiatives
• Collaborative assistance programs

26. **Develop a business-friendly regulatory and tax system and business assistance/incentive programs.**

Responsibility: County planning departments and economic development organizations, local governments, local/community development organizations, Southern Tier West RPDB
Timetable: Ongoing
Funding: Various local, state, and federal funds; foundation funds

Examples of potential initiatives/projects:
• Permit and regulatory technical assistance initiatives
• Collaborative assistance programs

27. **Enhance regional marketing capacity and activities.**

Responsibility: County planning departments and economic development organizations, local governments, local/community development organizations, Southern Tier West RPDB
Timetable: Ongoing
Funding: Various local, state, and federal funds; foundation funds
Examples of potential initiatives/projects:

- Regional and local marketing initiatives, including:
  - Internal and external marketing of the quality of life in the region, including rural character, low crime rates, education and health services, recreational and cultural opportunities, etc.
  - External tourism marketing, including marketing of recreational, entertainment, sporting, and cultural assets
  - Targeted external marketing directed toward target industry clusters and specific development opportunities, encouraging high-wage, high-skill businesses to develop in the region
  - Market entrepreneurial and employment opportunities to college graduates, to those who previously had out-migrated from the region, and to displaced workers
  - Increased participation in global trade shows
  - Increased use of US DOC International Trade Administration and NYS ESD channels for international marketing
  - Increased utilization of “smart” and targeted web-based marketing efforts
  - Increased utilization of social media in economic development marketing activities
- Regional and local branding initiatives
- Regional ambassador initiatives
- Marketing web site development and utilization of social media
- Joint marketing and coordination of scheduling

**Collaborative Leadership** – to encourage coordinated governance and rational and coordinated systemic investment in targeted economic development initiatives.

28. **Encourage community-level, county-level, and regional-level comprehensive planning and strategic economic development planning**, develop and implement community and economic development projects consistent with those plans and with smart growth principles and sound environment principles, and create and appropriate capital funds to implement projects.

Responsibility: County planning departments and economic development organizations, local governments, local/community development organizations, Seneca Nation of Indians, Southern Tier West RPDB

Funding: Various local, state, and federal funds

Examples of potential initiatives/projects:

- Increased strategic comprehensive planning and economic development planning
- Increased strategic economic development project development and implementation
- Encouragement of preparation and readiness on the part of economic development project sponsors so as to achieve economic development success, including the following steps to achieve readiness:
  - Provision of technical assistance to potential and actual project sponsors to assist them with readiness for the development and implementation of economic development projects
  - Achievement of consensus and agreement amongst project participants as to individual organizational roles and responsibilities and commitments
  - Development of financial capital resources necessary to undertake economic development projects,
e.g., capital reserve accounts, grantsmanship, provision for public-private partnering, etc.

- Acquisition of appropriate land control (fee simple control or options on land proposed for subsequent development) as needed
- Engagement of engineering and other consultants as appropriate and necessary to prepare preliminary engineering, to study soil conditions, archeological resources, flora and fauna issues, historical preservation issues, etc.
- Obtain all appropriate and required regulatory permits (e.g., SEQRA, NEPA, SHPO / OPRHP, DEC, US Army Corps, US Fish and Wildlife, etc.)
- Work with prospective beneficiary businesses to achieve consensus regarding shared expectations of each other’s plans, and to obtain commitments from beneficiary businesses to implement their plans (investment, job creation, etc.) conditioned on any incentives or development initiatives promised by the project sponsor

- Grantsmanship to support implementation of planned economic development initiatives
- Initiatives to enhance partnership, collaboration, and coordination
- Create and capitalize capital funds or other funding mechanisms to implement projects

29. **Improve coordination and collaboration between and among all levels of government as well as the private sector, including enhancing public-private partnerships, and make strategic investments that are aligned with and further regional priorities.**

<table>

</table>

Examples of potential initiatives/projects:

- Increased strategic comprehensive planning and economic development planning
- Increased strategic economic development project development and implementation
- Initiatives to enhance partnership, collaboration, and coordination
- Improvement, creation, and utilization of “civic spaces,” both physical and virtual, and other cornerstone community institutions
- Regionalized infrastructure services and intergovernmental shared services and promotion of centralization and regionalization of governance and municipal services as a means of reducing service delivery costs and improving services, including shared services initiatives, consolidation initiatives, multi-municipal infrastructure system initiatives, etc.
- Collaborations with the Seneca Nation of Indians to capture the potential of the Seneca Nation of Indians as a driver of economic development, and provide economic benefits to tribal members and non-tribal members
- Increased investment in business development / business assistance capacity, entrepreneurial development, and innovation
- Initiatives to enhance innovation with respect to government operations and increase operating efficiency of government operations
- Initiatives encouraging the direction of a greater percentage of anchor institutions’ and residents’ purchasing power toward local vendors based in the community
Encourage anchor institutions to hire a greater percentage of their workforce locally.
Encourage anchor institutions to provide workforce training for people needing assistance in the community.
Encourage anchor institutions to incubate the development of new businesses, including social enterprise among nonprofits.
Encourage anchor institutions to serve as advisors and network builders.
Leverage real estate development to promote local retail, employer-assisted housing, and community land trusts.

30. Improve leadership training and enhance public involvement in coordinating decision-making and investments at the regional level.
Responsibility:  County governments, county planning departments and economic development organizations, local governments, local/community development organizations, educational system, non-profit sector, private sector/business community, Seneca Nation of Indians, Southern Tier West RPDB
Timetable: Ongoing
Funding: Various local, state, and federal funds
Examples of potential initiatives/projects:
- Leadership training and development initiatives
- Internships and mentoring programs
- Targeted technical assistance programs
- Initiatives to promote public access to and involvement in governmental and civic decision-making
- Initiatives to promote collaborative decision-making between parallel and vertical levels of government and organizations

31. **Seneca Nation of Indians initiatives:**
The Seneca Nation of Indians prepares its own CEDS document containing a specification of an economic development action plan, which is comprised of the economic development objectives, and for each objective, a specification of the responsibility for accomplishment, a timetable for accomplishing the objective, and funding opportunities. A recent version of the Seneca Nation of Indians CEDS was not available at the time of preparation of this CEDS.

32. **Resilience Building Initiatives**
Responsibility:  County governments, county planning departments and economic development organizations, county emergency management offices, local governments, local/community development organizations, private sector/business community, Seneca Nation of Indians, Southern Tier West RPDB
Timetable: Ongoing
Funding: Various local, state, and federal funds
Examples of potential initiatives/projects:
- Create county-level networks, that integrate emergency management personnel, economic development personnel, and other key stakeholders, to actively and regularly communicate and collaborate regarding proactive mitigation and post-disruption response
- Undertake appropriate infrastructure capital investment projects to mitigate potential disruptions due to natural disasters
• Diversify economy
• Upgrade labor force skills and job transferability
• Promote innovation, adoption of new technologies and productivity enhancement, and entrepreneurship
• Target development of emerging clusters
• Establish formalized mechanisms to realign and retrain local workforces post-disruption
• Increase recruitment of fire and emergency management service volunteers
The region’s Action Plan is made more specific by the specification of certain priority strategic projects, programs, and activities. This CEDS actually provides four separate project lists: (1) a list of priority EDA projects, (2) a list of priority ARC projects, (3) a comprehensive list of all priority economic development projects in the region (including but not limited to the EDA and ARC priority projects from the other two lists), and (4) a list of economic resilience projects.

**Priority EDA Projects**

The first list of projects is a list of projects that the Southern Tier West Board designated in July 2020 as being priorities for EDA investment. This list identifies the top two EDA investment (project) priorities for each county in the region, and also identifies priorities for EDA funding for regional (i.e., non-county-specific) projects impacting more than one county. With one exception, all of the projects in this EDA priority project list are seeking EDA public works funding; the one exception is a regional project seeking EDA technical assistance funding. Within each county, projects are listed in order of descending priority. The projects in this list were identified to the Southern Tier West Board by the individual counties, which also had indicated their own relative priorities for each project. Over the course of the coming year, the Southern Tier West Board may amend this list, including priorities within individual counties, as circumstances warrant.

**Allegany County**

1. **Alfred Center for Technology Transfer Project**
   - **Description:** Creation of a facility that will identify research and applied technologies being developed at Alfred University and Alfred State College and translate them into local jobs.
   - **Sponsor:** Allegany County
   - **Total cost:** TBD; funding sources: TBD
   - **Job impact:** 120 C / 10 R
   - **Date:** 2020

2. **Crossroads Development Infrastructure System Project**
   - **Description:** Construction of water distribution line and wastewater collection line from the Friendship municipal systems east along County Route 20 to the intersection with NYS 19 to support business development at I86 Exit 30 interchange
   - **Sponsor:** Allegany County
   - **Job impact:** 120 C / 10 R
   - **Total cost:** TBD
   - **Date:** 2020

**Cattaraugus County**

1. **Allegany (Town) Exit 24 Wastewater Infrastructure Project**
   - **Description:** Construction of wastewater infrastructure to facilitate development at I86 interchange
   - **Sponsor:** Town of Allegany
   - **Total cost:** TBD; funding sources: Cattaraugus County, Town of Allegany, HUD
   - **Job impact:** 100 C
   - **Date:** 2020
Chautauqua County

1. **Empire State Brands Integrated Hops & Barley Processing Facility**
   - Description: Establishing a fully-integrated Hops, Barley, and Grains processing facility to supply raw materials for breweries and healthy food products for markets in the Northeastern US, utilizing a facility located in northern Chautauqua County.
   - Sponsor: Chautauqua County IDA/Chautauqua County/City of Dunkirk
   - Job Impact: TBD
   - Total Cost: $15 Million
   - Date: 2021

2. **Ripley Gateway Project**
   - Description: Purchase of land and construction of a local arts and agricultural value-added center that promotes and sells western New York products as an economic driver for local business and a tourism destination facility.
   - Sponsor: Chautauqua County
   - Total Cost: $16 Million
   - Job Impact: 30+
   - Date: 2021

Regional Projects

1. **Broadband Development Project** (EDA Public Works Funding)
   - Description: Improvement’s to region’s broadband infrastructure system
   - Sponsor: Southern Tier West RP & DB
   - Total cost: TBD; funding sources: TBD
   - Job impact: N/A
   - Date: 2020

2. **Southern Tier Extension Railroad Authority Railroad Rehabilitation Project** (EDA public works funding)
   - Description: Railroad line capital rehabilitation at various points along mainline railroad
   - Sponsor: Southern Tier Extension Railroad Authority
   - Total cost: $15,000,000; funding sources: TBD (EDA, NYS DOT, FRA, Private)
   - Job impact: 50 C
   - Date: 2020

3. **Site Development Planning Project Phase 1** (EDA technical assistance funding)
   - Description: Planning project to support development of shovel ready railroad-served sites
   - Sponsor: Southern Tier West RP & DB
   - Total cost: TBD; funding sources: TBD
   - Job impact: N/A
   - Date: 2020

4. **Transload Facility Project Phase 1** (EDA public works funding)
   - Description: Construction of first phase of rail/highway freight transload facility on Constitution Avenue in Olean
   - Sponsor: Southern Tier Extension Railroad Authority
   - Total cost: TBD; funding sources: TBD (EDA, NYS DOT, FRA, Private)
   - Job impact: 10 + C
   - Date: 2021
Priority ARC Projects

The second project list is a list of projects that the Southern Tier West Board designated in June 2018 as being economic development priorities for funding by ARC. The projects in this list are grouped into three main priority categories as designated by the Southern Tier West Board. Within each priority category, projects are not ranked.

Key:
- C = Private sector for-profit Jobs projected to be created as a consequence of the project
- R = Private sector for-profit Jobs projected to be retained as a consequence of the project
- FTE = Full Time Equivalent
- TBD or N/A = to be determined or not applicable or available at time of CEDS publication

High Priority Category

Workforce Development Through Refrigeration Training Enhancements
Sponsor: Alfred State College of Technology – HVAC Training Program
Total Cost: $214,000; funding sources: ARC $150,000, applicant $64,000
Job Impact: 120 C
Date: 2021

Education and Training Fund Program
Sponsor: UPMC Chautauqua
Total Cost: $200,000; funding sources: ARC $100,000, WCA Foundation $52,500, CRCF $26,000, applicant $21,000
Job Impact: 70 C
Date: 2021

African American Cultural Center Project
Sponsor: Olean Business Development Corporation
Total Cost: $300,000; funding sources: ARC $150,000, applicant $150,000
Job Impact: 2 C
Date: 2021

Pathways to Success: Seneca Nation Arts and Crafts Tourism Initiative
Sponsor: Seneca Iroquois National Museum
Total Cost: $78,832; funding sources: ARC $39,416, applicant $39,416
Job Impact: 10 C
Date: 2021

High Priority Category

STEDO Revolving Loan Fund Recapitalization
Sponsor: Southern Tier Enterprise Development Organization, Inc.
Total Cost: $300,000; funding sources: ARC $150,000, private sector loan recipients $150,000
Job Impact: 22 C
Date: 2021

Increased Talent Pipeline for Software Developers
Sponsor: Jamestown Community College
Total Cost: $325,101.27; funding sources: ARC $149,996.24, private sector fees $94,500, applicant $80,605.03
Job Impact: 1 C
Date: 2021
Comprehensive Project List of Economic Development Projects

The third project list is a comprehensive list of ready-to-go economic development projects that are planned by sponsors to be implemented over the next 12 to 18 months (i.e., through the end of 2022). As noted above, this third list includes the designated EDA and ARC priority projects indicated above.

All of the projects in this list are economic development projects, programs and activities that Southern Tier West suggests should be implemented so as to implement the Goals and Objectives of this CEDS. Readers of the CEDS should note certain overarching "themes" for regional economic development in this third list (e.g., infrastructure development, technology, labor force, etc.). Readers of the CEDS also are encouraged to view the projects in the project list in terms of prior related investments.

The Comprehensive Project List has five sections: Allegany County Projects, Cattaraugus County Projects, Chautauqua County Projects, Regional Projects, and Seneca Nation of Indians Projects. There is no explicit ranking of projects within any of these five sections; however, the highest priority projects within each section are highlighted in yellow and appear at the top of the list in each of the five sections. Also, projects generally are grouped together with other similar projects within each of the five sections (e.g., infrastructure projects are grouped together, etc.). Otherwise, there is no other ordering or ranking within a given section, or as between the five sections.

The project list identifies projects by project name, project sponsor, total project cost and funding sources and amounts (if known), projected private sector for-profit jobs to be created and/or retained as a consequence of the implementation of the project (if known), and projected date of implementation (if known). (Exception: Projects sponsored by the Seneca Nation of Indians may involve creation or retention of jobs provided by the Seneca Nation of Indians or one of its affiliated corporations, which may or may not be thought of as being public sector jobs.)

Projects included in this project list include – but are not limited to – those projects that propose the use of either or both ARC or EDA funds as project funding source(s).

Key:

- **C** = Private sector for-profit Jobs projected to be created as a consequence of the project
- **R** = Private sector for-profit Jobs projected to be retained as a consequence of the project
- **FTE** = Full Time Equivalent
- **TBD or N/A** = to be determined or not applicable or available at time of CEDS publication

The titles of the highest priority projects are highlighted in yellow.
Allegany County Projects

Alfred Center for Technology Transfer Project
Sponsor: Allegany County
Total cost: TBD; funding sources: TBD
Job impact: 120 C / 10 R
Date: 2020

Alfred University Integrated Manufacturing Center Project
Sponsor: Alfred University
Job impact: 7 C
Total cost: $10,050,000; funding sources: TBD
Date: 2020

Workforce Development Through Refrigeration Training Enhancements
Sponsor: Alfred State College of Technology – HVAC Training Program
Total Cost: $214,000; funding sources: ARC $150,000, applicant $64,000
Job Impact: 120 C
Date: 2021

Crossroads Development Infrastructure System Project
Sponsor: Allegany County
Job impact: 500 C / 10 R
Total cost: TBD
Date: 2020

Crossroads Business Park Foreign Trade Zone / Sub-zone Project
1.3 priority
Sponsor: Allegany County Industrial Development Agency
Total Cost: $45,000; funding sources TBD
Job impact: 20 C, 5 R
Date: 2021

VanCampen Industrial Park Access Road Project; CR 20 S-Curve Site
1.3 priority
Sponsor: Allegany County IDA
Total Cost: $750,000; funding sources TBD
Job impact: 50 C
Date: 2021

Railroad Spur and Switch Gears Project; CR 20 S-Curve Site
1.6 priority
Sponsor: Allegany County IDA
Total Cost: $500,000; funding sources TBD
Job impact: 50 C
Date: 2021

Crossroads Water Tank Project
4 priority
Sponsor: Allegany Crossroads Development LDC
Total Cost: $1,000,000; funding sources TBD
Job impact: TBD
Date: 2021
Friendship to Amity Sewer Line Project
Sponsor: Allegany Crossroads Development LDC
Total Cost: $8,500,000; funding sources TBD
Job impact: TBD
Date: 2021

Crossroads Business Park Hotel Development Project
Sponsor: Allegany County Industrial Development Agency
Total Cost: $15,000,000; funding sources TBD
Job impact: TBD
Date: TBD

Crossroads Electric Rebuild Project
Sponsor: Allegany County IDA
Total Cost: $38,000,000; funding sources TBD
Job impact: TBD
Date: 2021

Broadband/Fiber Optic Project
Sponsor: Southern Tier West RPDB
Total Cost: $20,000,000; funding sources TBD
Job impact: TBD
Date: 2021

Alfred Village Water Supply Upgrade Project
Sponsor: Village of Alfred
Total Cost: TBD; funding sources TBD
Job impact: TBD
Date: 2021

Alfred Business Development Assistance Project
Sponsor: Village of Alfred
Total Cost: $250,000; funding sources TBD
Job impact: TBD
Date: 2021

Alfred Development and Implementation of Revitalization Plan and Initiatives
Sponsor: Village of Alfred, public/private partnership
Total Cost: $30,000; funding sources TBD
Job impact: TBD
Date: 2021

Alfred Main and University Streets Improvements Project
Sponsor: Village of Alfred
Total Cost: $625,000; funding sources TBD
Job impact: TBD
Date: 2021

Alfred Reconstruction of Route 244
Sponsor: Town and Village of Alfred
Total Cost: $1,625,000; funding sources TBD
Job impact: TBD
Date: 2021
Alfred Sewer System Project: C9-6601-04-00
Sponsor: Village of Alfred
Total Cost: $1,509,000; funding sources TBD
Job impact: TBD
Date: 2021

Alfred Wastewater Treatment Plant Upgrade Project
Sponsor: Village of Alfred
Total Cost: $5,000,000; funding sources TBD
Job impact: 1000 R
Date: 2021

Alfred Wastewater Treatment Sludge Digester Renovation Project
Sponsor: Village of Alfred
Total Cost: TBD; funding sources TBD
Job impact: TBD
Date: 2021

Sugar Hill Industrial Park Development Project, Phase 2
Sponsor: Sugar Hill Development Corporation
Total Cost: TBD; funding sources TBD
Job impact: TBD
Date: 2021

Sugar Hill Water Tank Project
Sponsor: TBD
Total Cost: $900,000; funding sources TBD
Job impact: 20 C, 50 R
Date: 2021

Allentown School Renovation and Reuse Project
Sponsor: Town of Alma
Total Cost: $3,000,000; funding sources TBD
Job impact: 30 C
Date: 2021

Almond Wastewater System Improvements Project
Sponsor: Village of Almond
Total Cost: $2,000,000; funding sources TBD
Job impact: TBD
Date: 2021

Almond Wastewater System Improvements Project with New Line from Alfred
Sponsor: Village of Almond
Total Cost: $9,000,000; funding sources TBD
Job impact: TBD
Date: 2021
Almond Distribution Upgrade Project Phase 3
Sponsor: Village of Almond
Total Cost: $257,500; funding sources TBD
Job impact: TBD
Date: 2021

Almond Water Storage and Distribution System Project Phase 2
Sponsor: Village of Almond
Total Cost: $3,492,000; funding sources TBD
Job impact: TBD
Date: 2021

Almond Water Districts
Sponsor: Town of Almond
Total Cost: $75,000; funding sources TBD
Job impact: TBD
Date: 2021

Almond Water Treatment Plant and Storage Upgrade
Sponsor: Village of Almond
Total Cost: $922,000; funding sources TBD
Job impact: TBD
Date: 2021

Almond Water Project
Sponsor: Village and Town of Almond
Total Cost: $600,000; funding sources TBD
Job impact: TBD
Date: 2021

Andover Main Street Project
Sponsor: Village of Andover
Total Cost: $250,000; funding sources TBD
Job impact: TBD
Date: 2021

Andover New Water Treatment Plant and Upgrade Project
Sponsor: Village of Andover
Total Cost: $4,500,000; funding sources TBD
Job impact: TBD
Date: 2021

Andover Public Water Project
Sponsor: Village of Andover
Total Cost: $11,200,000; funding sources TBD
Job impact: TBD
Date: 2021

Andover Wastewater System Improvements Project
Sponsor: Village of Andover
Total Cost: $1,000,000; funding sources TBD
Job impact: TBD
Date: 2021
Andover Water Source Project
Sponsor: Village of Andover
Total Cost: $3,299,000; funding sources TBD
Job impact: TBD
Date: 2021

Andover Public Sewer System
Sponsor: Village of Andover
Total Cost: $1,950,000; funding sources TBD
Job impact: TBD
Date: 2021

Andover Sewer System Project:C9-6695-01-00
Sponsor: Village of Andover
Total Cost: $18,827,000; funding sources TBD
Job impact: TBD
Date: 2021

Angelica School Restoration/Renovation Project
Sponsor: New LDC
Total Cost: $2,250,000; funding sources TBD
Job impact: 30 C
Date: 2021

Belfast Water Distribution Project
Sponsor: Town of Belfast
Total Cost: $2,000,000; funding sources TBD
Job impact: TBD
Date: 2021

Belmont Water Distribution System Upgrade Project
Sponsor: Village of Belmont
Total Cost: $405,827; funding sources TBD
Job impact: TBD
Date: 2021

Belmont Water Distribution Project
Sponsor: Village of Belmont
Total Cost: $900,000; funding sources TBD
Job impact: TBD
Date: 2021

Belmont School Restoration/Renovation Project
Sponsor: New LDC
Total Cost: $9,800,000; funding sources TBD
Job impact: 100 C

Economic Resilience Projects

All Projects to be undertaken by some combination of County Departments of Planning and Development (in each county), County Industrial Development Agencies (in each county), and/or Southern Tier West; certain projects also may be appropriate for implementation by municipalities

County-Level Economic Resilience (Disaster Response and Recovery) Planning Project
Sponsor: County P&D, Southern Tier West
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

GIS Project to Identify Major Employers in Floodplains
Sponsor: County P&D, Southern Tier West
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

Business Risk Assessment Project
Sponsor: County P&D, County IDA, Southern Tier West
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

Agricultural Business Risk Assessment / Information Dissemination Project
Sponsor: County P&D, County IDA, Southern Tier West
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

Business Risk Self-Assessment Web Cookbook Project
Sponsor: County P&D, County IDA, Southern Tier West
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

Surge Capital/Credit Fund Project
Sponsor: County P&D, County IDA, Southern Tier West
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

Community Infrastructure/Asset Mitigation Project
Sponsor: Municipalities
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020

Utility/Broadband Infrastructure Mitigation Project
Sponsor: Private Utilities
Total cost: $ TBD; funding sources: TBD
Job impact: TBD
Date: 2020
Performance Measures

The implementation schedule for the CEDS (i.e., when projects are projected to be implemented) can act as the evaluation framework for the CEDS. However, because timely implementation and completion of projects often is a function of parameters outside the control of the project sponsor (example: unavailability of funds, affordability, etc.), there are inherent limitations in using the implementation schedule to evaluate performance.

An alternate evaluation framework would be limited to projects actually commenced, and would involve measuring, at some defined term, say 3 or 5 years out from completion of the project, whether private sector investment expect to be induced, and/or jobs expected to be created, or other expected outputs (e.g., numbers of persons trained, etc.) actually have occurred.
CEDS Planning Process

The 2020 CEDS has been revised in several ways:

- Revised format / structure
- Updated and current demographic and economic data
- Revised descriptive narrative
- Updated SWOT analysis, resilience text, strategic text, and project lists

Southern Tier West contacted the three county planning and development departments, the three county industrial development agencies, the planning and development departments of the three cities in the region, the workforce development agencies, the major cities, major development groups, and the general public, asking for participation, and for a list of currently planned economic development projects in their jurisdictions. The Southern Tier West Board also was asked for input during the revision process.

**Members of the 2020 CEDS Strategy Committee**

Southern Tier West assembled a 2020 CEDS Strategy Committee, responsible for overseeing the development of the 2020 CEDS document, which included a diverse set of stakeholders (including the public sector, private interests, non-profits, educational institutions, and community organizations). The following persons were members of the 2020 CEDS Strategy Committee:

</table>
The Southern Tier West Board also:

- At its July 2020 Board meeting, the Southern Tier West Board adopted a resolution recognizing county-level priorities for EDA investment within their counties, and for EDA investment in regional projects. These priorities were informed by internal discussions within the individual counties, often via the county planning and development departments, industrial development agencies, county planning boards, and/or county planning and economic development committees. These EDA priority projects are listed in the CEDS.

- In the summer of 2020, the Southern Tier West Board prioritized projects for FY21 ARC funding. These ARC priority projects are listed in the CEDS.

The entire draft 2020 CEDS was placed on the Southern Tier West web site in August 2020 for a 30 day public review and comment period, and the Southern Tier West Board approved a finalized version of the 2020 CEDS at its September 2020 Board meeting.

***

In succeeding years, as the region moves toward implementing the CEDS plan, the partnering organizations, as appropriate, will be involved in the implementation of the CEDS plan, often as project sponsors, and also as partners in the implementation of projects sponsored by other organizations. The commitment of these partnering organizations is important to coordinate project implementation, and to seek, obtain, and target project funding. Southern Tier West also will engage these partnering organizations in monitoring progress on the CEDS and to keep the plan both current and relevant.

The following information is excerpted from a Seneca Nation of Indians PowerPoint presentation entitled “Comprehensive Economic Development Strategy (CEDS) 2019-2024 Strategic Direction/Action Plan.”

**CEDS Vision Statement**

“To develop and promote; a culturally, healthy and economically sustainable Seneca Community for 7 Generations”

**CEDS Strategic Directions**

Areas emphasized within the CEDS Strategic Direction/Action Plan are:

A. Culture  
B. Community - Quality of Life  
C. Education and Workforce  
D. Infrastructure  
E. Economic Development

**A. Culture**

**GOAL:** “Preserve, Promote, and Protect Seneca Culture (Language, Arts, Traditions): Teach and raise awareness of Seneca Culture”

**OBJECTIVES:**

1. Raise the number of fluent Seneca speakers  
2. Properly promote and share Haudenosaunee culture  
3. Document and Preserve language and culture  
4. Help the community to live a cultural life  
5. Capitalize on the rich Seneca culture to draw tourism

**ACTION PLAN:**

Culture and heritage is the cornerstone of the Seneca people. Focus on preserving traditional language, sharing its rich culture, and attracting new visitors and investors through cultural tourism and development.

**B. Quality of Life, Community and Health**

**GOAL:** “Increase the physical, spiritual, social, and economic well-being of the Seneca community to the highest level possible”

**OBJECTIVES:**

1. Invest in Land – expand land base  
2. Improve/increase walkability and recreational opportunities  
3. Restore food and resource sovereignty and protection  
4. Get Back to Our Roots (traditional mindset – community driven)

   a. Invest in the people  
   b. Healthy people = Healthy Nation
5. Assess the loss of local hospitals near the territories and consider replacement near the territories

ACTION PLAN:
The Seneca Nation will improve the well-being of the community through the expansion of programs, services, and social opportunities that will continue to address a multitude of needs and promote wellness.

C. **Education and Workforce Development**

**GOAL:** “Develop a diverse skills workforce and professional base by establishing the highest level of standards for education and experienced professionals”

**OBJECTIVES:**

1. Increase graduation rates by supporting parents and children through graduation
2. Help K-12 focus on improving school readiness skills and enrichment
3. Share/promote diverse post graduate opportunities (Military, Trade school, Jr. College, University)
4. Retain skilled professionals: (Keep those who have obtained their higher education and developed their skills on Territory)
5. Train and continuously train current staff
6. Hire and retain qualified staff
7. Career Education and Financial Literacy

**ACTION PLAN:**
The Seneca Nation will improve academic outcomes by providing incentives, numerous educational opportunities and avenues to increase high school and college graduations rates.

D. **Infrastructure Improvements**

**GOAL:** “Build and maintain infrastructure that sustains and enhances the community for economic development”

**OBJECTIVES:**

1. Assess current infrastructure capacity and Identify gaps
2. Expand pedestrian facilities (Transit Stops, Crosswalks, Walkways, Street Furniture, etc.)
3. Increase Green/Sustainable energy resources (Wind, Solar, Hydro)
4. Have wastewater treatment infrastructure that meets current capacity and potential for future growth
5. Establish full broadband access to everyone across the Territory
6. Establish the ability to enforce Nation laws/ traffic fines remain on Territory
7. Adopt a plan for proper Land Use
8. Improve conditions and safety of transportation infrastructure
9. Capitalize on interstate and thruway traffic for economic development
10. Expand railways to allow for public transportation and excursions
11. Expand Natural Gas Infrastructure
12. Increase Street/Road Lighting
ACTION PLAN:
The Seneca Nation aims to improve the quality of life and promote economic development opportunities through modern and highly maintained utility infrastructure and transportation networks.

**E. Economic Development**

**GOAL:** Develop a sustainable, diverse, growing economy that encourages entrepreneurship and investment in the Seneca Nation.

**OBJECTIVES:**
1. Develop a Strategic Economic Plan for the SNI City of Salamanca in cooperation with the Seneca Nation
2. Friendly Neighbors – the Seneca Nation will conduct urban and regional economic development activities in areas surrounding its gaming facilities throughout WNY
3. Increase tourism - develop tourism plan with new attractions
4. Diversify the Seneca Nation economy
5. Help promote and defend private business owners
6. Build up the Nation’s natural resources to provide for new economic opportunities
7. Create a recreational development plan with new opportunities
8. Capitalize on the available infrastructure and resources (Railroad, Thruway/Interstates, Great Lakes)
9. Create and sustain valuable partnerships with other agencies, municipalities, and stakeholders
10. Revitalize historic Main Street in the City of Salamanca
11. Develop minority business training center
12. Improve Short and Long term planning by developing a Seneca Nation Masterplan
   a. Adopt Smart Growth policies
   b. Re-establish Planning Commission.

**ACTION PLAN:**
The Seneca Nation aims to sustain and grow the local economy, through a multifaceted approach to economic development. With culture and sovereignty as the cornerstone for economic growth, the Seneca Nation will increase its recreation and tourism potential, improve local partnerships, and diversify its economic portfolio by capitalizing on all available social and natural resources.

**Economic Resiliency**

- Regional economic prosperity is heavily linked to an area's ability to prevent, withstand and quickly recover from major disruptions (i.e. shocks) to its economic base.
  1) The ability to recover,
  2) The ability to withstand a shock, and
  3) The ability to avoid the shock altogether.

- A key to economic resilience is maintaining the geographic information systems (GIS) necessary that link with municipal business licenses, demographic information, and other business establishment data bases to track local and regional development sites.

- Through the SNI business programs and promoting better businesses continually:
1) Businesses will understand their vulnerabilities
2) So they are prepared to take actions to resume operations after an event.

- The Seneca Nation Emergency Management Department serves the citizens of the Seneca Nation through effective preparedness exercises and proper planning for natural and man-made disasters.
